Hi Tyree,

It makes sense to refer to us as DIAND, considering it is the legal name of the department.

Statistically Similar
CARD agrees that "statistically similar" is a difficult term to define as it can vary depending on how a statistical analysis was setup. For this reason, CARD suggests changing the current wording from *"...deactivated upon two consecutive years of COC concentration variability that is statistically similar to the Control.."*, and replacing it with *"...deactivated upon recommendation in the Status of Environment Report."*

Thanks for the clarification on F.14.

Please give me a call if you would like to further discuss the SNP station deactivation.

Thanks again,

Murray

Hey Murray,

We are needing some help and are going to provide some clarification for you…

INAC vs DIAND
We are going to change the licence to reference DIAND not INAC. This question was asked to Carey and the email link below is what he provided.
http://www.mvlwb.ca/Boards/mv/Registry/2016/MV2016L8-0006/MV2016X0021%20MV2016L8-0006%20-%20INAC%20-%20Legal%20Name%20of%20Applicant%20-%20Change%20to%20DIAND%20-%20Aug16-16.pdf

Definition of Statically Similar
We are needing your help on a definition of “statistically similar”

The new condition (F.14) is the old condition D.3. The Plan was approved in August 2010. The version of the plan was the July 14th, 2010 version.

IF you have any questions please feel free to give me a shout.

Thanks

T
