Hello Christopher,

The Regulator delegated the following authorities to me under section 8(1) of OGOA on the following terms and conditions:

1. You may approve, on my behalf, any change to or deviation from the work or activities authorized under a well approval issued under subsection 10(4) of OGOA, including, but not limited to, changes in equipment, program, specifications, or standards.
2. This delegation is effective from January 3, 2023, to March 31, 2023.
3. These delegated authorities may not be further delegated.

Based on this delegation, the fact this change is purely for diagnostic purposes and you are on the well bore right now, I approve this change.

Additionally, the cause of the communication with the SCV must be identified to OROGO once determined and if the remedial operations currently approved cannot address the issue, a variation will need to me applied for.

Good Evening,

Attached is a variation request for the Cameron F-75 well (2022-SOG-F-75-WID 1971). We have finished the removal of the shallow permanent bridge plug and now we can pump down the well and get water returns out the surface casing vent. We propose investigating the source of this communication with a packer in a manner similar to the Cameron M-74 well. Once completed, we will prepare a summary and repair to be reviewed with OROGO.

Thank you,

Christopher Gagnon, EIT
