**(Subsection 19(2) of Mackenzie Valley Land Use Regulations)**

**INFORMATION IN SUPPORT OF AN APPLICATION FOR A LAND USE PERMIT**

The information contained in this application and in any supporting documents pertaining to this application is collected under the authority of the Mackenzie Valley Resource Management Act for the purpose of reviewing the request for the use of land in the Gwich'in Settlement Area and any potential approvals that may be required. The information contained herein pertains to the conduct of public business and cannot be kept confidential. It will be shared with government departments and agencies, first nations organizations, community organizations and other regulatory agencies and will be treated as information that third parties have the right to under the Access to Information and Protection of Privacy Act. This application and any supporting documents pertaining to this application will be filed in the Public Registry at the offices of the Gwich'in Land and Water Board in Inuvik, NT, as per the Mackenzie Valley Resource Management Act.

## ELIGIBILITY FOR A PERMIT

- 18 (a) (i) A person is eligible for a permit who where the proposed land-use operation is in the exercise of a right to search for, win or exploit minerals or natural resources, holds the right.
- 18 (a) (ii) A person is eligible for a permit who where the proposed land-use operation is in the exercise of a right to search for, win or exploit minerals or natural resources, is the manager of operations, where the right is held by two or more persons who have entered into an exploration or operating agreement designating one of them as the manager of operations.
- 18 (a) (iii) A person is eligible for a permit who where the proposed land-use operation is in the exercise of a right to search for, win or exploit minerals or natural resources, is the person who contracts to have the land-use operation carried out, where the right is held by two or more persons who have not entered into an exploration or operating agreement designating one of them as manager of operations.
- 18 (b) (i) A person is eligible for a permit who, in any other case, has a right to occupy the land and who contracts to have the land-use operation carried out.
- 18 (b) (ii) A person is eligible for a permit who, in any other case, is the person who is to carry out the operation.

## APPLICATION FOR A PERMIT

An application for a permit shall be submitted to the Gwich'in Land and Water Board on the form provided and shall be accompanied by the application fee and any applicable land-use fee, and by a preliminary plan, that shows;

- the lands proposed to be used in the land-use operation and an estimate of the area; and
- the approximate location of all
  - existing lines, trails, rights-of-way and cleared areas proposed to be used in the land-use operation,
  - new lines, trails, rights-of-way and cleared areas proposed to be used in the land-use operation,
  - buildings, structures, campsites, air landing strips, air navigation aids, fuel and supply storage sites, waste disposal sites, excavations and other works and places proposed to be constructed or used in the land-use operation, and
  - bridges, dams, ditches, railroads, roads, transmission lines, pipelines, survey lines, monuments, historical and archaeological sites, burial grounds, air landing strips, watercourses, traplines and cabins that may be affected by the land use operation.

A preliminary plan shall:

- be drawn on a scale that clearly shows the lands that the applicant proposes to use; and
- show the scale to which the plan is drawn; and
- show locations by geographic co-ordinates.

## FINAL PLAN

Every permittee shall, within 60 days after the completion of a land-use operation or the expiration of the permit, whichever occurs first, submit a final plan in duplicate to the Board and, where the land-use operation was carried out on private lands, to the landowner thereof, showing

- the lands on which the land-use operation was conducted;
- the location of
  - lines, trails, rights-of-way and cleared areas that were used by the permittee during the land-use operation, specifying those that were cleared by the permittee and those that existed before the operation began,
  - buildings, structures, campsites, air landing strips, air navigation aids, fuel and supply storage sites, waste disposal sites, excavations and other works and places that were constructed or used by the permittee in the land-use operation, and
  - bridges, dams, ditches, railroads, roads, transmission lines, pipelines, survey lines, monuments, air landing strips, watercourses, traplines and cabins and all other features or works that were affected by the land-use operation; and
- calculations of the area of the lands used in the land-use operation.

On receipt of a written request from a permittee for an extension of time for the filing of a final plan, the Board may extend the time for filing the final plan by not more than 60 days.

The Board shall reject any final plan that is not complete.

Within three weeks after receipt of written notice from the Board rejecting a plan, a permittee shall submit to the Board a final plan that is complete.

Notwithstanding the expiration or cancellation of a permit, the submission of a final plan or the giving of a notice of discontinuance, a permittee remains responsible for all obligations arising under the permit or under the Mackenzie Valley Land Use Regulations until such time as the Board issues a letter of clearance pursuant.

A final plan shall:

- be drawn on a scale that clearly shows the lands that the applicant for a permit proposes to use or that the permittee has used;
- show the scale to which the plan is drawn; and
- show locations by geographic co-ordinates.

Within 30 days after the Board has approved the final plan, a permittee shall submit to the Board calculations of any applicable land-use fee payable, based on the actual area of land used in the land-use operation.

Where the calculated fee is less than the fee submitted with the application, the Board shall refund the difference to the permittee.

Where the calculated fee is greater than the fee submitted with the application, the permittee shall submit payment for the amount of the deficiency with the calculations.

## EQUIPMENT LIST

YEAR	MAKE	VIN
1981	980C Loader	63X03565
2002	Kamatsu WA500 Loader	A71065

2007	Elrus Jaw Crusher	M4452ER07JP
	Mormak Conveyer Stacker	48-28090-85

## **SPILL RESPONSE PROCEDURES**

The following procedure will be followed in the event of a spill. Steps are listed in the order of importance; however, depending on circumstances, conditions, and potential injuries, this order may be altered to meet specific needs.

All employees will be briefed on these procedures and regular visual checks will be carried out to ensure no spills have occurred.

### **1. Identify the product spilled:**

If the identity is unknown, and if identification means further risks, then action must be based on the assumption that the product is extremely dangerous. The crew is not to smell, taste, touch or attempt to reach ruptured containers if they are surrounded by the contaminant.

### **2. Assessment of dangers and hazards:**

Immediate determination will be made about the direction of the spill's progress, whether downhill, towards the water, or already in the water. As well, careful attention will be paid to the full nature of the incident: is this solely a surface contaminant, or are fumes an additional factor; are there any injuries current or possible.

### **3. Stop the flow at source:**

- Has the flow been stopped or is it still leaking?
- Is there an emergency shut-off valve?
- Have holes in the container been patched?
- Is the container empty?

Note: An attempt to stop the flow will be done only if it is safe to do so.

### **4. Take actions to contain the spill:**

Land based measures may include application of absorbents, construction of berms and diversion/collection trenches. Water based measures may include dams, dykes, and floating booms.

### **5. Report Action to the NWT Spills Hotline:**

**NWT SPILLS HOTLINE PHONE NUMBER - (867) 920 - 8130**

The person calling the NWT Spills Hotline will give as much of the following information as possible:

- Name, Address and Phone Number of Person reporting the Spill.
- Date, Time and Location of Spill.
- Type and Amount of Spill (gas, diesel, etc.).
- Cause of Spill.
- Type, Size and Number of Storage Containers.
- Amount in Storage Containers.
- Has the Spill stopped, or is continuing? And if so, in what direction?
- Action taken to recover, clean-up and dispose of spilled contaminant.
- Description of existing containment.
- Name and Phone Number of Persons close to the location of the Spill.
- Name of Person in charge at the time of the Spill.

Note: The operators at the NWT Spills Hotline are NOT experts in spill management. The information supplied to them is for relay purposes only.

## REPORTING PROCEDURE

1. Spill is noticed:
  - Is the source of the spill still flowing?
  - Can the source be safely turned off? If yes, turn off.
2. Foreman or supervisor is notified immediately and depending on circumstances:
  - The foreman or supervisor will either decide to take immediate actions to stop the source of the flow or contain the flow, or
  - The foreman or supervisor will call the NWT Spills Hotline to file a report and request further information about who should be called and what should be done.
3. The on-site personnel will receive directions from the NWT Spills Line about the appropriate personnel to call.

Area to be worked.
