Explanatory Remarks -

James Creek:

During the inspection on July 25, 2018 at the James Creek maintenance camp there were no concerns observed by the inspectors.

The camp site is very clean and organized, there is just the one gravel conveyer that was on the previous inspection reports which was recommended to be removed.

Department of Lands would like to recommend that an amendment be made to the equipment list for the gravel conveyer to be added to the Land Use Permit. It is the proponent responsibility to ensure there is no leaks of petroleum products onto the site from their equipment.
