Subject: Re: Giant working group - DRAFT memo on engagement process for surface design

Hi all, a gentle reminder I am looking for comments on the proposed engagement process by **Thursday December 19th**.

Happy holidays and see you all in the New Year

Jane

Hi working group members,

Attached is a draft memo for discussion. As requested, Daryl Hockley has prepared a summary of a proposed engagement process on surface design which he presented at the October 9th working group meeting. This memo is for discussion only with the intent of getting input and comments from the parties. Please distribute to your members and anyone you think would be interested in providing input.

At the end of the memo there are several questions and areas that we are looking for feedback on, however if you have additional questions, comments or suggestions please don't hesitate to pass them along or get in touch with the project team.

I'd like to request written feedback from the parties and request **comments be submitted no later than December 19th, 2014**. Our next meeting is scheduled for December 11th. The main agenda item will be the HHRA but we can include a short agenda item to discuss the memo and what the next steps are for moving forward with an engagement process.

Thanks
Jane
