

# Giant Mine Remediation Plan - July 2007

## Supporting Document Index

(click  on title to open PDF file)

### **A Environmental Conditions**

- A1 Impact the Yellowknife Giant Gold Mine on the Yellowknives Dene
- A2 Baseline Study Reference List
- A3 Ecological Investigations at Giant Mine
- A4 Biological Sampling at Baker Creek 2002
- A5 Biological Sampling at Baker Creek 2003
- A6 Baker Creek Fish Habitat & Rehabilitation Study for AR Planning
- A7 Fisheries
- A8 Arsenic Concentration and Speciation in Fishes
- A9 Muskrat Sample Collection Program at Baker Creek
- A10 Giant Mine Migratory Bird Survey
- A11 Air Quality Monitoring at Giant Mine Site

### **B Geochemical Characterization**

- B1 Structural Geology
- B2 Geochemistry of Mine Wastes
- B3 Tailings Backfill in the Giant Mine
- B4 Underground Mine Water Chemistry
- B5 Summary of Routine SNP Monitoring Programs
- B6 Surface Water Chemistry
- B7 Geochemical Characterization of Other Sources

### **C Hydrogeology**

- C1 Giant Mine Hydrogeology
- C2 Update to Supporting Document 2
- C3 Groundwater Monitoring System Installation Report 2004
- C4 Groundwater Monitoring System: November 2004 Monitoring Update
- C5 Groundwater Modelling: Model Design and Simulation Results
- C6 Groundwater Modelling Update – Giant Mine Remediation Project

### **D Arsenic Trioxide Dust Chambers & Stopes**

- D1 Crown Pillar Stability Evaluation
- D2 Arsenic Trioxide Chamber Drilling and Testing

### **E Pit Stability**

- E1 Site Wide Crown Pillar Stability Investigation
- E2 Pit Stability Review

### **F Historic Foreshore Tailings**

- F1 Review of Yellowknife Bay Tailings EA
- F2 Investigation of the Distribution of Historic Tailings
- F3 The Potential for Geochemical and Microbial Remobilization of Arsenic

### **G Baker Creek**

- G1 Giant Mine Flood Hydrology
- G2 Baker Creek Restoration Concepts
- G3 Baker Creek and C1 Pit at the Giant Mine

### **H Borrow Sources**

- H1 Giant Mine Borrow Investigation
- H2 Air Photo Interpretation of Potential Borrow Areas
- H3 Summary of Potential Borrow Sources

### **I Surface Contamination Investigations**

- I1 Distribution of Arsenic in Surficial Materials
- I2 Subsurface Environmental Investigation

### **J Ground Freezing**

- J1 Conceptual Engineering for Ground Freezing

### **K Tailings and Sludge Remediation**

- K1 Tailings and Sludge Containment Areas
- K2 Characterization of Soil and Groundwater

### **L Water Treatment**

- L1 Water Treatment Update
- L2 Giant Mine Effluent Dilution Study

### **M Supporting Calculations of Arsenic Release**

- M1 Estimates of Flow and Arsenic Releases

### **N Risk Assessment**

- N1 Tier 2 Risk Assessment, Giant Mine Remediation Plan

### **P Communications**

- P1 Plan Public Consultation and Communications

### **Q Project Implementation**

- Q1 Cooperation Agreement
- Q2 Legislation, Policies and Guidelines
- Q3 Withdrawal Order in Council
- Q4 Environmental Impact Matrix
- Q5 Scoping of Potential Cumulative Effects
- Q6 Socio-Economic Impact Assessment
