**RE: Water Licence Renewal Application – MV2009L3-0007**  
**Response to GNWT Department of Environment and Natural Resources**  
**(ENR) Intervention**

Dear Ms. Carter,

As indicated in ENR's intervention, the City met with ENR to discuss their Letter of Comment and Recommendations dated September 30, 2009 and the City's subsequent response. The City is in agreement with the items laid out in ENR's intervention with the exception of item 1.a)iii. which requests that the Leachate Modeling Study "characterize the bedrock integrity and identify permeability or fracturing." The City recommends that the wording be changed to, "to the extent of being reasonably feasible, to characterize the bedrock integrity, which includes the identification of permeability and/or fracturing."

Should you require further clarification for any of the City's responses, please contact me directly at (867) 920-5689 or [walexander@yellowknife.ca](mailto:walexander@yellowknife.ca).

Sincerely,

A handwritten signature in blue ink, appearing to read "Wendy Alexander".
