Dear Ms. Alexander:

### **New Water Treatment Plant**

In follow up to your letter dated June 4, 2013 regarding the new Water Treatment Plant (WTP), the Mackenzie Valley Land and Water Board (MVLWB) is issuing an information request to the City of Yellowknife. The MVLWB requires further information on the following issues:

- The anticipated composition and volume of the new waste stream(s) that will be generated by the new WTP;
- Any management actions that would be taken to ensure that water quality at the outflow point of the sewage lagoon system is not affected by the introduction of these new waste(s); and
- A list of the chemicals that will be used, their purpose, and an MSDS sheet for each chemical to be used.

Please forward this information as soon as it is available. Once we receive a response it will be sent for a two-week review period. The City of Yellowknife will have the opportunity to respond to reviewer comments before the application is brought to the Board for a decision.

If you have any questions or concerns, please contact me at (867) 766-7469 or email [mehrlich@mvlwb.com](mailto:mehrlich@mvlwb.com).

Yours sincerely,

A handwritten signature in cursive script that reads "M Ehrlich".

Miki Ehrlich  
Regulatory Officer
