Sewage Effluent Discharge

Licence Number: MV2009L3-0025

The Hamlet of Fort Liard requests permission to perform a decant from Cell #2 of the Sewage Lagoon Disposal Facilities.

The Hamlet will be having de-sludging of Cell #3 began in 2017 completed. To perform this work, it will be necessary to create storage and treatment space for on-going community sewage disposal. Cell #3 will be out of operation for the time it is anticipated to take to complete the work.

It is anticipated that Cell #2 effluent concentrations will be very close to Cell #3 results. The space that will be created with a partial decant of Cell #2 will enable the planned work to be completed with no interruption of municipal sewage operations.

Samples of the effluent will be sent to CARO Analytical Services to test for current contaminate levels contained in effluent.

Test results will be forwarded to your attention as soon as they are received. If results do not meet license effluent standards permission will be requested to perform Cell #2 emergency decant.

Sincerely,

Alan Harris
