Application # _____
Copied To ES / Permit

Sewage Effluent Discharge
Licence Number: MV2009L3-0025

The Hamlet of Fort Liard requests permission to perform decant from Cell #3 of the Sewage Lagoon Disposal Facilities. The Hamlet is planning to continue the de-sludging process began in 2017. To perform this work, it will be necessary to partially drain effluent currently contained in lagoon #3.

Samples of the effluent will be sent to CARO Analytical Services to test for current contaminate levels contained in effluent.

Test results of cell #3 effluent will be forwarded to your attention as soon as they are received by this office. If test results do not meet license effluent quality standards permission is requested to perform emergency decant.

The decant of cell #3 will be scheduled to begin after receipt of test results and your permission to proceed. The decant is forecast to take between 3 and 5 days to complete.

Sincerely,

Alan Harris
