Subject: RE: Decant request August 2017 (Hamlet of Fort Liard)

Hi Alan,

Good to speak with you this morning. Further to our recent conversation, I wanted to acknowledge that I will provide coverage in authorizing the decant request attached. As for procedure, I would like to review the pre-decant sample results and know the current amount of freeboard at cell # 3 where the decant is requested. Please forward this information to me when available.

In addition, as per Part 2 (a) of the Surveillance Network program in the Hamlet's licence, if the decant period is less than 7 days a pre and post decant sample will be required and should be analyzed for the parameters listed in the licence.

If you have any questions with regard to the above, please don't hesitate to contact me.

Regards,

Wendy

Sewage Effluent Discharge

Licence Number: MV2009L3-0025

The Hamlet of Fort Liard requests permission to perform decant from Cell #3 of the Sewage Lagoon Disposal Facilities. As you are aware the Hamlet is currently involved in the Sewage Lagoon Desludging Plan of Sewage Lagoon #3 submitted for your approval in July 2017. To perform this work, it will be necessary to drain effluent currently contained in this lagoon structure

Samples of the effluent will be sent to CARO Analytical Services, August 28, 2017 to test for current contaminate levels contained in effluent.

Test results of cell #3 effluent tests will be forwarded to your attention as soon as they are received by this office. If test results do not meet license effluent quality standards permission is requested to perform emergency decant.

The decant of cell #3 will be scheduled to begin upon receipt of test results and your permission to proceed. The decant is forecast to take 5 days to complete.

Sincerely,

Alan Harris
