Dear Mr. Liu,

**Re: Snap Lake Mine – Water License 2011L2-0004
Response to SLEMA Regarding Decision to Remove Non-Reportable Spills from
Monthly SNP**

Please accept this letter in response to SLEMA's (Snap Lake Environmental Monitoring Agency) email, dated October 3, 2014, whereby non-reportable spills have been excluded from the monthly Surveillance Network Program (SNP) for August 2014.

De Beers Canada Inc.(Debeers) has been in discussion with the GNWT Inspector(s), and has reviewed the Board correspondence, dated June 1, 2012, entitled "Clarification of Spill Reporting Expectations to the Land and Water Boards of the Mackenzie Valley", and understands the requirements for proponents when pertaining to spill reporting, to be the following:

- Maintain records for all spills, whether on the surface or within an underground operation;
- Report all spills greater than 100 litres, whether on the surface or within an underground operation, to the 24-Hour Spill Hotline in accordance with instructions contained in the "NT-NU Spill Report" form, the *Spill Reporting Protocol for Mining Operations* (2004), or subsequent versions; and
- Ensure compliance with all land use permit and water licence conditions related to spill reporting and all applicable legislation and regulations.

De Beers is compliant with all aspects of the Board issued document pertaining to spill reporting, and for this reason the decision was made to no longer provide non-reportable spills in the monthly SNP.

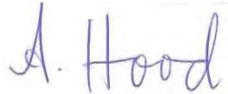

The document is attached for your review and records.

To Distribution:

Clarification of Spill Reporting Expectations to the Land and Water Boards of the Mackenzie Valley

The Mackenzie Valley, Gwich'in, Sahtu, and Wek'èezhii Land and Water Boards recently reviewed their roles and responsibilities with respect to spill reporting requirements for surface and underground spills that occur at projects licensed under the *Mackenzie Valley Resource Management Act* (MVRMA).

During the review, the Boards considered correspondence from both the GNWT Department of Environment and Natural Resources and Aboriginal Affairs and Northern Development Canada (AANDC). The Boards also took into consideration the MVRMA, the *NWT Waters Act* and their associated regulations, a legal review, and the *Indian and Northern Affairs Canada Spill Reporting Protocol for Mining Operations in the Northwest Territories*.

The Boards have determined that they require proponents to:

- Maintain records for all spills, whether on the surface or within an underground operation;
- Report all spills greater than 100 litres, whether on the surface or within an underground operation, to the 24-Hour Spill Hotline in accordance with instructions contained in the "NT-NU Spill Report" form, the *Spill Reporting Protocol for Mining Operations* (2004), or subsequent versions; and
- Ensure compliance with all land use permit and water licence conditions related to spill reporting and all applicable legislation and regulations.

It is the expectation of the Land and Water Boards that clarification of these requirements will ensure consistency of their application throughout the Mackenzie Valley.

If you have any questions or concerns, please contact your local Land and Water Board.

Sincerely,

Willard Hagen,
Chair,
Mackenzie Valley Land and Water Board

Larry Wallace,
Chair,
Sahtu Land and Water Board

Violet Camsell-Blondin,
Chair,
Wek'eezhii Land and Water Board

Paul Sullivan,
Chair,
Gwich'in Land and Water Board
