Subject: Further information required (due July 10)

Jean,
After review of your responses to reviewers, we are still missing some key information. Please submit or elaborate on the following by 5pm on July 10, 2011.

1. Snow disposal plan. Please describe how the town disposes of snow. Also, provide a map illustrating the snow disposal locations for the town (this map can be hand-drawn for now).
2. Does the Town have a current Spill Contingency Plan to be used for spills of fuel, lubricants, etc. This plan would include the reporting, containment procedures, clean-up procedures, mitigation for any potential spills.
3. Please provide the data for all sampling in all locations done during the course of your licence. This can be requested from Taiga Environmental Lab (the lab can export all data to an excel spreadsheet). Our technical director, Kathy Racher will be happy to call on your behalf, but you will need to give permission to Taiga lab to do this. Kathy will phone you to elaborate on this point.
4. In regards to your response to comment #10 for leachate from the landfill. You refer to the Slave River Monitoring Program Data analysis in your answer; however this information is not on the record. If you have further information to file in support of this comment, please submit it.
5. In regards to your response to comment 26. You referred to a 2005 report, however did not provide the report or a name of the report. What report are you referring to? Please submit it.
6. In regards to your response to comment 31. You referred to a AECL evaluation, what report are you referring to. If you have more information that supports this comment, please send it in.

The above information is required for your water licence. Please submit all the above by 5pm on July 10, 2011 (this Friday). If you have any questions, please contact me.

Kathleen
