Subject: Giant Air Monitoring

Greetings,

Fenceline monitoring at Giant wrapped up yesterday, however, community station monitoring will continue at a reduced level throughout the winter. It is our understanding that we do not need to provide weekly reports on the community stations.

We will provide the last weekly report towards the end of this week. Included in the cover letter will be the address to the GNWT's site that provides all the community monitoring information.

Please let us know if we are correct in our interpretations.

Cheers, Tara.
