**Giant Mine Remediation Project Ambient Air Quality Monitoring Program summary  
for the week ending April 25, 2020.**

A summary of the Giant Mine Remediation Project ambient air quality monitoring program for the week ending April 25, 2020 is as follows:

Site Perimeter Stations

- Air quality monitoring at the site perimeter stations was completed at 12:00 AM December 1, 2019;
- All laboratory analyses of integrated 24-hour arsenic, PM<sub>10</sub>, and TSP filter samples collected at the site perimeter stations have been reported.

Community Stations

- No continuous PM<sub>2.5</sub> or PM<sub>10</sub> 24-hour average concentrations above the referenced standards for each were measured at any of the community stations during the week;
- Laboratory results from integrated TSP, PM<sub>10</sub>, and trace metals (including arsenic) samples collected on April 9, 2020 at the community stations were less than the analytical detection limit and/or below the referenced standard. Laboratory analyses of community station filters collected after April 9, 2020 are pending;
- Laboratory results from asbestos samples collected on April 3 and 9, 2020 at the community stations were less than the analytical detection limit and/or below the referenced standard. Laboratory analyses of asbestos samples collected at the community stations after April 9, 2020 are pending;
- There were no NO<sub>2</sub> concentrations measured at the Niven Lake community station above the NWT Ambient Air Quality 24-hour Standard of 106 parts per billion (ppb) or the one-hour Standard of 213 ppb during the week. Table 1 summarizes each day's maximum hourly concentration and each day's 24-hour average concentration at the Niven Lake community station during the week.

**Table 1**  
**Niven Lake Community Station NO<sub>2</sub> Concentrations**

<b>Date</b>	<b>Maximum One-hour Average (ppb)</b>	<b>24-hour Average (ppb)</b>
April 19, 2020	1.4	0.5
April 20, 2020	4.3	1.8
April 21, 2020	2.8	1.1
April 22, 2020	1.3	0.5
April 23, 2020	7.0	2.1
April 24, 2020	2.2	0.3
April 25, 2020	0.2	0.1

General Operation

Integrated sampling for TSP, PM<sub>10</sub>, and trace metals (including arsenic) was conducted on April 21, 2020. The next regularly scheduled sampling is April 27, 2020.

Sincerely,

Natalie Plato  
Deputy Director Giant Mine Remediation Project
