Miki

Thanks for sending these...I do not understand how I could have missed these given the dates on the originals/

I request a meeting with Mr Hagen as I see his letter stating that the Boards decision is final, however, no one has attempted to answer my questions about how having us truck or fly garbage back to Yellowknife and then incinerate it here has a positive effect on the environment. If indeed the Board did consider our arguments. You are essentially helping to drive us out of business.

We have operated Mackey Lake Lodge since 1989 and had achieved international recognition as an aboriginal cultural hunting, fishing and adventure lodge that incorporated tradition knowledge and was environmentally friendly. Now we are being run over by expanding mining and exploration activities that has affected the caribou migrations.... and we are being subjected to rules and regulations that are designed for seasonal explorations camps with large budgets.

All one need look at is the applications forms and process to see that this was not developed with the outfitters and lodges in mind.

On behalf of our shareholders, I am asking that you take another look at these issues or we will have no choice but to turn to another level of political recourse, public opinion and the judicial system.

Gary Jaeb
President
Mackay Lake Lodge '89 Ltd

that have affected the caribou migrations and we are being subjected to a relatively new set of rules that are clearly designed for the mineral industries which have sufficient resources and are often short term and This is my last attempt at trying to find an affordable solution to the

My questions about approved facilities refers to incinerators and fuel disposal as well

Subject: Re: MV2013J0006 - True North Safaris Ltd. - Issuance - Type A Land Use Permit

Amanda

I got an email from you/someone during the application process that advised me to make sure that the Board members got my point of view so i asked Miki to do this as i do not know how to forward info to the members.

I was then told that my input had been put on the public registry, however, it now appears that the Board members did not get to consider my concerns, only recommendations from staff with the drafted conditions that are now in the permit. This seems to undermine the Board's role and our concern, as the applicant, that we would get a fair hearing.
Please advise.

This especially relates to the permit requirement that we transport garbage back to Yellowknife and have it incinerated here..Our argument is that we will incur unnecessary expenses and burn more fossil fuel, infecting the environment, only to have them burned at another location ..that we cannot use accelerants to burn garbage and we must transport fuel and ashes back to a licensed facilities.

Throughout the process I asked for information about who are the licensed facilities and how one can get a license and I got no response other than told to check the yellow pages. Please provide this information.

We did provide a waste management plan and spill contingency plan but the permit makes no reference to these but require that we submit plans in a few months. Please explain this.

Gary Jaeb

Please advise
