Hi Tyree

Attached is the responses I've received so far. Should I prompt the others for a response?
I'm happy to learn the process and I really appreciate your openness to my questions.

Shannon

Hi Shannon,

Have you been keeping a record of the questions asked? If you have can you send that to me. Once I receive that piece then the application will be complete. If you have any questions please feel free to contact me.

Thanks for your patience and understanding for the process.

Cheers,

Tyree

Good Morning Tyree

The Akaitcho Screening Board acknowledged receipt of the application & NWT Metis Nation asked me some questions and requested some information which I sent. I haven't heard back from other groups.
Am I looking for specific wording from the stakeholders?

Shannon

Hi Shannon,

I am just wondering how the follow up is going? Have you received anything from any of the parties?

Have a good day.

Tyree Mullaney

Good Afternoon,

Please accept this email message as receipt of your correspondence regarding your recent application for a new MVLWB land use permit within Akaitcho Territory.

Marsi Cho.

Hi Tim

The Environmental Emergency Response starts on page 66 & The Environmental Protection Policies start on page 107 of the Mackenzie Valley Permit Application that was attached to my original email. The Environmental Emergency Response discusses fuel spills but I have also attached another Action Plan for your information.

Thanks, Shannon

Hi Shannon, The container wording is the same, no problem. The plans and policies are the company, Environmental Emergency Plans, Emergency Spill Management Plan and the Environmental Policies.

Thanks, Tim H.

Good Afternoon Tim

I spoke with Atco Frontac our fuel contractor he was not familiar with the term "Dip Container" but they do use "Containment Trays" during the refueling.

Can you be more specific about the company plans your looking for please?
Thank you, Shannon

Hello Shannon, The NWTMN have only one concern and that is the refueling, from the tanker to the tank the helicopter slings into the site and refueling of the generators. The NWTMN IMA committee would like to know if there is a dip container used at both ends. Also they would like copies of your companies plans. Other than that they do not have any comments.

Thank you, Tim H.
