Dear Mr. Alan Taylor,

RE: Application for Land Use Permit and Water Licence for an All Season Access Road

Thank you for your application dated April 16, 2014 for a land use permit and water licence for an all-season access road associated with the proposed mine development at Prairie Creek. This is to confirm that our office has received original copies of your application and payment on April 28, 2014.

Further to our previous conversations, and consistent with our Memorandum of Understanding, we would like to convene a meeting of the Technical Committee to further discuss your application.

During this meeting we can provide you with an analysis of where we feel more information on your proposal will be needed as we move forward through the environmental assessment process. This will provide you with the necessary information that would facilitate a fulsome and effective season for research and engineering.

We will be in contact with your office to coordinate a time and location for the meeting in late May or early June. If you have further questions or concerns, please contact Jonathan Tsetso at (867) 695-7752.

Sincerely,

David Britton
