**Re: MV2017C0022 – Final Plan and Request for Discontinuance of Land Use Permit,
Glowworm Lake Property, NT**

Dear Ms. Cli-Michaud:

As you are aware, Dominion Diamond Mines ULC (Dominion) has recently applied for a revised Land Use Permit for the Glowworm Lake Project, MV2019C0030. This LUP application is intended to cover the same activities as authorized by LUP MV2017C0022 along with the inclusion of additional activities in the permit scope. Upon issuance of LUP MV2019C0030, Dominion requests that LUP MV2017C0022 be discontinued as per section 37 of the *Mackenzie Valley Land Use Regulations*. Discontinuance would allow for there to be one LUP for the Glowworm Lake Project and avoid the situation of having two permits for the same area and activities.

Since the issuance of LUP MV2017C0022 in July 2017 the following work was performed:

- Fuel cache established;
- Temporary shelter for emergency use and general weather protection set up at the Glowworm Lake fuel cache; and
- Geophysics work and till sampling.¹

Final Plan

As per section 29 of the *Mackenzie Valley Land Use Regulations*, Dominion submits the attached map and the following calculations for areas of lands used in the operation.

¹ All listed activities were conducted in either winter or summer field seasons 2019. For more information see the MVLWB online registry at <https://mvlwb.com/registry/MV2017C0022>.
