Hello Stan et al.,

Julian passed your request on to me regarding the possibility of decreasing buffers around private structures. While Permit MV2017C0024 allows for adjusting the 300 metre buffers if authorized in writing by the Board, we recommend that PPML engage with both NTPC and the cabin owner, and obtain consent, prior to applying to the Board for the exception.

If you have any further questions regarding the file please contact Julian.

I would also like to take the opportunity to let you know that Rebecca Chouinard recently left the MVLWB and that I am now in the ED position. A new Regulatory Manager will be starting November 14.

Kind regards,

Shelagh

Julian:

Please find a request to enter the 300 metre buffers around a sub-station and a cabin at Pine Point.
