Mr. Terry Brooks
Department of Infrastructure
Government of the Northwest Territories
P.O. Box 1320
Yellowknife NT X1A 2L9

Email: Terry_Brooks@gov.nt.ca

Dear Mr. Brooks,

**Re: Issuance of Type A Land Use Permit – Amendment 1
GNWT-INF – Mackenzie Highway, NWT #1**

Attached is the amended Type A Land Use Permit MV2017X0019 granted by the Mackenzie Valley Land and Water Board (MVLWB or the Board) in accordance with the *Mackenzie Valley Resource Management Act*.

Conditions

Please read all conditions carefully.

Public Registry

A copy of this Permit and all related correspondence and documents has been filed on the [Public Registry](#) at the MVLWB office. Please be advised that this letter, inspection reports, and related correspondence is part of the Public Registry and is intended to keep all interested parties informed of the manner in which the Permit requirements are being met. All Public Registry material will be considered if an amendment to the Permit is requested.

The full cooperation of GNWT-Department of Infrastructure is anticipated and appreciated. If you have any questions or concerns, please contact Tyree Mullaney at (867) 867-766-7464 or email tyree@mvlwb.com.

Yours sincerely,

A handwritten signature in blue ink, appearing to read "Mavis Cli-Michaud".

Mavis Cli-Michaud
MVLWB, Chair

Attached: Land Use Permit MV2017X0019 – Amended September 20, 2018
Reasons for Decision

Land Use Permit

Permit Class	Permit No	Amendment No and Date
A	MV2017X0019	September 20, 2018

Subject to the Mackenzie Valley Land Use Regulations and the terms and conditions in this Permit, authority is hereby granted to:

Government of the Northwest Territories –
Department of Infrastructure

Permittee

to proceed with the land use operation described in the Application of:

Signature Mr. Binay Yadav	Date March 30, 2017
Type of Land Use Operation Miscellaneous	
Location NWT Highway #1, km 0-278	

This Permit may be assigned, extended, discontinued, suspended, or cancelled pursuant to the Mackenzie Valley Land Use Regulations.

Dated at Yellowknife this 20 day of September, 2018

Signature Chair

Mavis Clif-Michaud

Signature Witness

Tanya Lantz

Commencement Date

May 15, 2017

Expiry Date

May 14, 2022

ATTENTION

It is a condition of this Permit that the Permittee comply with the provisions of the *Mackenzie Valley Resource Management Act* and Regulations and the terms and conditions set out herein. A failure to comply may result in suspension or cancellation of this Permit.

Part A: Scope of Permit

1. This Permit entitles the Permittee to conduct the following land-use operation:

- The continuous and ongoing operation and maintenance of the existing NWT public highway system within the permit corridor along the Mackenzie Highway (NWT #1) Corridor between km 0 (AB/NT border) and km 278 (Axe Handle area) and includes:
 - Mackenzie Highway (NWT #1) km 0 to km 278;
 - the Kakisa and Hart Lake access roads;
 - pullouts and rest areas; and
 - other minor roads and accesses along the Mackenzie Highway Corridor – Waterfall Route and as listed under the *Public Highways Act* as Commissioners Land for the Government of the NWT and includes all highways, roadways, and other transportation infrastructure.
- Work activities also include:
 - roadway and right-of way maintenance;
 - rehabilitation or reconstruction;
 - bridge structure maintenance;
 - culvert installation;
 - maintenance of drainage channels;
 - establishment and maintenance of drainage channels;
 - excavation or extraction of granular materials;
 - production of aggregates; and
 - roadway surfacing.
- The Permit area will be 2 kilometres in width, 1 kilometre on each side of the existing public highway/roadway centerline through the entire length of the permit corridor including access and minor roads as listed in the *Public Highways Act*;
- To access existing or future quarry areas within and outside the 2-kilometre corridor;
- To develop new or further develop existing borrow areas to obtain granular borrow materials, common materials, blast rock (including use of explosives), rip-rap, clay, and sand and gravel from areas outside the existing 60-metre wide public highway corridors through applications to GNWT - Lands for quarrying permits;
- To carry out geotechnical investigations in the search for gravels and rock and for gathering preliminary engineering information for the design of foundations for roadways, bridges, and other structures (as required);
- To place and maintain granular stockpiles at existing or approved quarry sites for the purpose of ongoing operations and maintenance of the public highway system within the permit corridor;
- To place temporary construction/work camps at existing quarry or previously developed sites within the permit corridor for the purpose of carrying out operations and maintenance of the public highway system and other roadways within the permit corridor;
- To temporarily store construction, operations, and maintenance equipment at the various existing quarry or other previously developed sites within the permit corridor while carrying out these activities in the area;
- To access water sources for the ongoing operations and maintenance of the public highway system within the permit corridor;
- Use and operation of fuel storage tanks in various sizes located at the temporary construction/work camp locations;
- To access 1 kilometre (1000 metres) on each side (left and right) of the public highway/roadway center line for the purpose of carrying out granular and geotechnical investigations, quarry pit development, drainage channel construction, stockpiling granular and other construction materials, and placement of temporary construction/work camps;

- To construct and maintain sand and sand/salt storage facilities at strategic locations along the designated highway corridor; and
 - To construct, operate, and maintain pullouts/rest areas at strategic locations along the designated highway corridor.
2. This Permit is issued subject to the conditions contained herein with respect to the use of land for the activities and area identified in Part A, item 1 of this Permit.
3. Compliance with the terms and conditions of this Permit does not excuse the Permittee from its obligation to comply with the requirements of any applicable Federal, Territorial, Tłchq, or Municipal laws.

Part B: Definitions (defined terms are capitalized throughout the Permit)

Act - the *Mackenzie Valley Resource Management Act*.

Archaeological Overview - as defined by the Prince of Wales Northern Heritage Centre – Guidelines for Developers.

Archaeological Impact Assessment - as defined by the Prince of Wales Northern Heritage Centre – Guidelines for Developers.

Board - the Mackenzie Valley Land and Water Board established under Part 4 of the Act.

Borehole - a hole that is made in the surface of the ground by drilling or boring.

Dogleg – the clearing of a line, trail, or right-of-way that is curved sufficiently so that no part of the clearing beyond the curve is visible when approached from either direction.

Drilling Fluids - any liquid mixture of water, sediment, drilling muds, chemical additives or other wastes that are pumped down hole while drilling and are specifically related to drilling activity.

Drilling Waste - all materials or chemicals, solid or liquid, associated with drilling, including drill cuttings and Drilling Fluids.

Durable Land - land that is able to withstand repeated use, such as gravel or sand with minimal vegetative cover.

Engagement Plan - a document, developed in accordance with the Board's June 2013, or amended editions, *Engagement and Consultation Policy* and the *Engagement Guidelines for Applicants and Holders of Water Licences and Land Use Permits*, that clearly describes how, when, and which engagement activities will occur with an affected party during the life of the project.

Flowing Artesian Well - a well in which water:

- a) Naturally rises above the ground surface or the top of any casing; and
- b) Flows naturally, either intermittently or continuously.

Fuel Storage Container - a container for the storage of petroleum or allied petroleum products with a capacity of less than 230 litres.

Fuel Storage Tank - a closed container for the storage of petroleum or allied petroleum products with a capacity of more than 230 litres.

Greywater - all liquid wastes from showers, baths, sinks, kitchens, and domestic washing facilities but not including toilet wastes.

Habitat - the area or type of site where a species or an individual of a species of wildlife naturally occurs or on which it depends, directly or indirectly, to carry out its life processes.

Inspector - an Inspector designated by the Minister under the *Mackenzie Valley Resource Management Act*.

Minister - the Minister of Indian Affairs and Northern Development Canada or the Minister of the Government of the Northwest Territories – Department of Lands, as the case may be.

Ordinary High Water Mark - the usual or average level to which a body of water rises at its highest point and remains for sufficient time so as to change the characteristics of the land. In flowing waters (rivers, streams) this refers to the “active channel/bank-full level” which is often the 1:2 year flood flow return level. In inland lakes, wetlands, or marine environments, it refers to those parts of the Watercourse bed and banks that are frequently flooded by water so as to leave a mark on the land and where the natural vegetation changes from predominately aquatic vegetation to terrestrial vegetation (excepting water tolerant species). For reservoirs, this refers to normal high operating levels (full supply level).

Permafrost - ground (soil or rock) that remains at or below 0°C for at least two consecutive years.

Permittee – the holder of this Permit.

Secondary Containment - containment that prevents liquids that leak from Fuel Storage Tanks or containers from reaching outside the containment area and includes double-walled Tanks, piping, liners, and impermeable barriers.

Sewage - all toilet wastes and Greywater.

Spill Contingency Plan - a document, developed in accordance with Aboriginal Affairs and Northern Development Canada’s *Guidelines for Spill Contingency Planning* (April 2007), that describes the set of procedures to be implemented to minimize the effects of a spill.

Sump - a man-made pit or natural depression in the earth's surface used for the purpose of depositing waste that does not contain Toxic Material, such as non-toxic Drilling Waste or Sewage, therein.

Toxic Material- any substance that enters or may enter the environment in a quantity or concentration or under conditions such that it:

- a) Has or may have an immediate or long-term harmful effect on the environment or its biological diversity;
- b) Constitutes or may constitute a danger to the environment on which life depends; or
- c) Constitutes or may constitute a danger in Canada to human life or health.

Waste – as defined in section 51 of the Act.

Waste Management Plan - a document, developed in accordance with the Board’s *Guidelines for Developing a Waste Management Plan*, that describes the methods of waste management from waste generation to final disposal.

Watercourse - a natural body of flowing or standing water or an area occupied by water during part of the year, and includes streams, springs, swamps and gulches but does not include groundwater.

Part C: Conditions Applying to All Activities (headings correspond to subsection 26(1) of the Mackenzie Valley Land Use Regulations)

26(1)(a) Location and Area

- | | | |
|----|---|-------------------------------|
| 1. | The Permittee shall not conduct any part of the land-use operation within 300 metres of any privately owned or leased land or structure, unless otherwise authorized in writing by the Board. | PRIVATE PROPERTY |
| 2. | The Permittee shall locate all camps on Durable Land or previously cleared areas. | CAMP LOCATION |
| 3. | The Permittee shall not conduct a quarry operation within 100 metres of the Ordinary High Water Mark of any Watercourse, unless otherwise authorized in writing by an Inspector. | QUARRY SETBACK |
| 4. | The Permittee shall not construct parallel lines or roads, unless an existing line or road cannot be used. | PARALLEL ROADS |
| 5. | The Permittee shall locate all lines, trails, and right-of-ways to be constructed parallel to any Watercourse a minimum of 100 metres from the Ordinary High Water Mark, except at crossings. | PARALLEL WATERCOURSE |
| 6. | The Permittee shall not conduct this land-use operation on any lands not designated in the complete application. | LOCATION OF ACTIVITIES |
| 7. | Prior to the commencement of the land-use operation, the Permittee shall mark each corner of the land-use area. | MARK AREA |
| 8. | The Permittee shall maintain the corner markings until the area is reclaimed. | CORNER POSTS |
| 9. | Prior to the commencement of the land-use operation, the Permittee shall accompany an Inspector during an inspection of the proposed land use area. | INSPECT LOCATIONS |

26(1)(b) Time

- | | | |
|-----|---|-------------------------------|
| 10. | At least 48 hours prior to the commencement of this land-use operation, the Permittee's Field Supervisor shall contact an Inspector at (867) 874-6995. | CONTACT INSPECTOR |
| 11. | At least 48 hours prior to commencement of this land-use operation, the Permittee shall provide the following information, in writing, to the Board <u>and</u> an Inspector:
a) the name(s) of the person(s) in charge of the field operation;
b) alternates; and
c) all methods for contacting the above person(s). | IDENTIFY AGENT |
| 12. | At least ten days prior to the completion of the land-use operation, the Permittee shall advise an Inspector of:
a) the plan for removal or storage of equipment and materials; and
b) when final cleanup and reclamation of the land used will be completed. | REPORTS BEFORE REMOVAL |
| 13. | The Board, for the purpose of this operation, designates March 31, as spring break-up. | SPRING BREAK-UP |

26(1)(c) Type and Size of Equipment

14. The Permittee shall not use any equipment except of a similar type, size, and number to that listed in the complete application. **ONLY APPROVED EQUIPMENT**

26(1)(d) Methods and Techniques

15. The Permittee shall Dogleg lines, trails and right-of-ways that approach Watercourses or public roads. **DOGLEG APPROACHES**
16. The Permittee shall leave a buffer strip of undisturbed vegetation at least 30 metres in width between cleared areas and public roads. **TREE SCREEN**
17. The Permittee shall replace all excavated material from the test pits prior to the expiry of this Permit. **TEST PITS**

26(1)(e) Type, Location, Capacity, and Operation of All Facilities

18. The Permittee shall ensure that the land use area is kept clean at all times. **CLEAN WORK AREA**
19. The Permittee shall not locate any Sump within 100 metres of the Ordinary High Water Mark of any Watercourse, unless otherwise authorized in writing by an Inspector. **SUMPS FROM WATER**
20. The Permittee shall provide the Board, as-built drawings of the salt shed and mixing areas prior to their initial use. **AS BUILT DRAWINGS**
21. The Permittee shall install liners/impermeable membranes at salt/sand mixing areas. **INSTALLATION OF LINERS**
22. The Permittee shall install an impermeable membrane below building foundations prior to construction as accepted by the Inspector. **INSTALLATION OF LINERS.**

26(1)(f) Control or Prevention of Ponding of Water, Flooding, Erosion, Slides, and Subsidence of Land

23. The Permittee shall install and maintain culverts such that scouring does not occur. **CULVERT SIZE**
24. The land-use operation shall not cause obstruction to any natural drainage. **NATURAL DRAINAGE**
25. The Permittee shall minimize erosion by installing erosion control structures as the land-use operation progresses. **PROGRESSIVE EROSION CONTROL**
26. The Permittee shall, where flowing water from a Borehole is encountered: **FLOWING ARTESIAN WELL**
- a) plug the Borehole in such a manner as to permanently prevent any further outflow of water; and
 - b) immediately report the occurrence to the Board and an Inspector.

27.	The Permittee shall prepare the site in such a manner as to prevent rutting of the ground surface.	PREVENTION OF RUTTING
28.	The Permittee shall suspend overland travel of equipment or vehicles at the first sign of rutting.	SUSPEND OVERLAND TRAVEL
29.	The Permittee shall not move any equipment or vehicles unless the ground surface is in a state capable of fully supporting the equipment or vehicles without rutting or gouging.	VEHICLE MOVEMENT FREEZE-UP
30.	The Permittee shall not use any material other than clean water and snow in the construction of ice bridges.	ICE BRIDGE MATERIALS
31.	The Permittee shall not use any materials other than clean snow and water in the construction of snow fills.	SNOWFILL MATERIALS
32.	Prior to spring break-up or completion of the land-use operation, the Permittee shall clean up and either remove or v-notch all snowfills from stream crossings, unless otherwise authorized in writing by an Inspector.	REMOVE OR V-NOTCH SNOWFILLS
33.	Prior to spring break-up or completion of the land-use operation, the Permittee shall clean up and v-notch all ice bridges, unless otherwise authorized in writing by an Inspector.	V-NOTCH ICE BRIDGES
34.	The Permittee shall not cut any stream bank, unless otherwise authorized in writing by an Inspector.	STREAM BANKS
35.	The Permittee shall minimize approach grades on all Watercourse crossings.	MINIMIZE APPROACH
36.	The Permittee shall not ford wet streams.	NO FORDING OF STREAMS
37.	The Permittee shall slope the sides of waste material piles, excavations, and embankments — except in solid rock — to a minimum ratio of 2:1 vertical, unless otherwise authorized in writing by an Inspector.	EXCAVATION AND EMBANKMENTS
38.	The Permittee shall not remove vegetation or operate heavy equipment within 100 metres of the Ordinary High Water Mark of any Watercourse.	WATERCOURSE BUFFER
39.	The Permittee shall not excavate land within 100 metres of the Ordinary High Water Mark of any Watercourse, unless otherwise authorized in writing by an Inspector.	EXCAVATE NEAR WATERCOURSE
26(1)(g) Use, Storage, Handling, and Ultimate Disposal of Any Chemical or Toxic Material		
40.	At least seven days prior to the use of any chemicals that were not identified in the complete application, the MSDS sheets must be provided to an Inspector and the Board.	CHEMICALS

41.	When drilling within 100 metres of the Ordinary High Water Mark of any Watercourse, and when drilling on ice, the Permittee shall contain all drill water and waste in a closed circuit system for reuse, off-site disposal, or deposit into a land-based Sump or natural depression.	DRILLING NEAR WATER OR ON ICE
42.	The Permittee may deposit Drilling Waste that does not contain Toxic Material in a Sump or natural depression. Any Sumps or natural depressions used to deposit Drilling Waste must be located at least 100 metres from the Ordinary High Water Mark of any Watercourse, unless otherwise authorized in writing by an Inspector.	DRILLING WASTE
43.	The Permittee shall remove all Drilling Waste containing Toxic Material to an approved disposal facility.	DRILLING WASTE DISPOSAL
44.	The Permittee shall not allow any Drilling Waste to spread to the surrounding lands or Watercourses.	DRILLING WASTE CONTAINMENT
45.	Prior to spring break-up, the Permittee shall reclaim all Sumps, unless otherwise authorized in writing by an Inspector.	RECLAIM SUMPS
46.	Prior to the expiry date of this Permit or the end of operations, whichever comes first, the Permittee shall backfill and restore all Sumps, unless otherwise authorized in writing by an Inspector.	BACKFILL SUMPS
47.	The Permittee shall maintain a record of all spills. For all reportable spills, in accordance with the GNWT <i>Spill Contingency Planning and Reporting Regulations</i> , the Permittee shall: <ul style="list-style-type: none"> a) immediately report each spill to the 24-hour Spill Report Line (867) 920-8130; b) report each spill to an Inspector within 24 hours; and c) submit, to the Board and an Inspector, a detailed report on each spill within 30 days. 	REPORT SPILLS
48.	The Permittee shall dispose of all Toxic Material as described in the approved Waste Management Plan.	WASTE CHEMICAL DISPOSAL
49.	The Permittee shall dispose of all combustible waste petroleum products by removal to an approved disposal facility.	WASTE PETROLEUM DISPOSAL
50.	The Permittee shall dispose of all waste petroleum products by removal to an approved disposal facility or by incineration in a device designed for this purpose, as described in the approved Waste Management Plan.	WASTE PETROLEUM DISPOSAL
26(1)(h) Wildlife and Fish Habitat		
51.	The Permittee shall take all reasonable measures to prevent damage to wildlife and fish Habitat during this land-use operation.	HABITAT DAMAGE
52.	The Permittee shall not obstruct the movement of fish while conducting this land-use operation. The Permittee shall construct and maintain all structures placed in streams frequented by fish in a manner that will not obstruct the passage of fish.	FREE FISH MOVEMENT

26(1)(i) Storage, Handling, and Disposal of Refuse or Sewage

- | | | |
|-----|---|------------------------------|
| 53. | The Permittee shall adhere to the Waste Management Plan , once approved, and shall annually review the plan and make any necessary revisions to reflect changes in operations, technology, chemicals, or fuels, or as directed by the Board. Revisions to the plan shall be submitted to the Board for approval. | WASTE
MANAGEMENT |
| 54. | The Permittee shall keep all garbage and debris in a secure container until disposal. | GARBAGE
CONTAINER |
| 55. | The Permittee shall dispose of all garbage, waste, and debris as described in the approved Waste Management Plan, unless otherwise authorized in writing by an Inspector. | REMOVE GARBAGE |
| 56. | The Permittee shall dispose of all Sewage and Greywater as described in the approved Waste Management Plan. | SEWAGE DISPOSAL |

26(1)(j) Protection of Historical, Archaeological, and Burial Sites

- | | | |
|-----|--|---|
| 57. | The Permittee shall not operate any vehicle or equipment within 100 metres of a known or suspected historical or archaeological site or burial ground. | ARCHAEOLOGICAL
BUFFER |
| 58. | The Permittee shall not knowingly remove, disturb, or displace any archaeological specimen or site. | SITE DISTURBANCE |
| 59. | The Permittee shall, where a suspected archaeological or historical site, or burial ground is discovered:

a) immediately suspend operations on the site; and
b) notify the Board at (867) 669-0506 or an Inspector at (867) 874-6995, and the Prince of Wales Northern Heritage Centre at (867) 767-9347 ext. 71251 or (867) 767-9347 ext. 71250. | SITE DISCOVERY AND
NOTIFICATION |
| 60. | At least 30 days prior to any new land disturbance, including new drill sites, the Permittee shall conduct an Archaeological Overview to identify areas of high and low potential for archaeological and burial sites and shall submit a summary report to the Board and the Prince of Wales Northern Heritage Centre.

Prior to disturbance in areas of high potential for archaeological or burial sites identified in the Archaeological Overview, the Permittee shall conduct an Archaeological Impact Assessment of the sites where disturbance is planned and shall submit a summary report to the Board and the Prince of Wales Northern Heritage Centre. | ARCHAEOLOGICAL
OVERVIEW

AIA – HIGH
POTENTIAL |

26(1)(k) Objects and Places of Recreational, Scenic, and Ecological Value

Intentionally left blank

26(1)(l) Security Deposit

61. All costs to remediate the area under this Permit are the responsibility of the Permittee. **RESPONSIBILITY FOR REMEDIATION COSTS**

26(1)(m) Fuel Storage

62. The Permittee shall: **CHECK FOR LEAKS**
- a) examine all Fuel Storage Tanks and containers for leaks a minimum once per day; and
 - b) repair all leaks immediately.
63. The Permittee shall not place any Fuel Storage Containers or Tanks within 100 metres of the Ordinary High Water Mark of any Watercourse, unless otherwise authorized in writing by an Inspector. **FUEL NEAR WATER**
64. The Permittee shall ensure that all fuel caches have adequate Secondary Containment. **FUEL CACHE SECONDARY CONTAINMENT**
65. The Permittee shall set up all refueling points with Secondary Containment. **SECONDARY CONTAINMENT – REFUELING**
66. The Permittee shall only use stands approved by an Inspector for supporting Fuel Storage Containers that are in use. **FUEL CONTAINER STANDS**
67. The Permittee shall not allow petroleum products to spread to surrounding lands or Watercourses. **FUEL CONTAINMENT**
68. The Permittee shall locate mobile fuel facilities on land when the facilities are stationary for more than 12 hours. **FUEL ON LAND**
69. The Permittee shall mark all Fuel Storage Containers and Tanks with the Permittee's name. **MARK CONTAINERS**
70. The Permittee shall mark all stationary fuel caches and fuel storage facilities with flags, posts, or similar devices so that they are at all times plainly visible to local vehicle travel. **MARK FUEL LOCATION**
71. Within ten days of the establishment of any fuel cache, the Permittee shall report the location and quantity of the cache in writing to an Inspector and the Board. **REPORT FUEL LOCATION**
72. The Permittee shall seal all outlets of Fuel Storage Containers and store the containers on their sides with the outlets located at 3 and 9 o'clock, except for containers currently in use. **SEAL OUTLET**
73. The Permittee shall adhere to the **Spill Contingency Plan**, once approved, and shall annually review the plan and make any necessary revisions to reflect changes in **SPILL CONTINGENCY PLAN**

operations, technology, chemicals, or fuels, or as directed by the Board. Revisions to the plan shall be submitted to the Board for approval.

- | | | |
|-----|---|------------------------|
| 74. | Prior to commencement of operations, the Permittee shall ensure that spill-response equipment is in place to respond to any potential spills. | SPILL RESPONSE |
| 75. | All equipment that may be parked for two hours or more, shall have a haz-mat/drip tray under it or be sufficiently diapered. Leaky equipment shall be repaired immediately. | DRIP TRAYS |
| 76. | The Permittee shall clean up all leaks, spills, and contaminated material. | CLEAN UP SPILLS |

26(1)(n) Methods and Techniques for Debris and Brush Disposal

- | | | |
|-----|--|----------------------------------|
| 77. | The Permittee shall progressively dispose of all brush and trees and shall complete all brush disposal; all disposal shall be completed prior to the expiry date of this Permit. | BRUSH DISPOSAL/
TIME |
| 78. | The Permittee shall not clear areas larger than identified in the complete application. | MINIMIZE AREA
CLEARED |
| 79. | The Permittee shall salvage all portions of trees cleared that are larger than 13 cm in diameter. | SALVAGE TIMBER |

26(1)(o) Restoration of the Lands

- | | | |
|-----|---|--|
| 80. | All areas affected by construction or removal activities shall be stabilized and landscaped to their pre-construction profiles, unless otherwise authorized in writing by an Inspector. | PRE-CONSTRUCTION
PROFILES |
| 81. | The Permittee shall dispose of all overburden as instructed by an Inspector. | DISPOSAL OF
OVERBURDEN |
| 82. | The Permittee shall store overburden and use it to recontour the site after operations are complete, unless otherwise authorized in writing by an Inspector. | SAVE AND PLACE
ORGANIC SOIL |
| 83. | The Permittee shall level all stockpiles of granular material located within the land use area prior to the expiry date of this Permit. | NO STOCKPILES |
| 84. | Prior to the expiry date of this Permit, the Permittee shall complete all cleanup and restoration of the lands used. | FINAL CLEANUP AND
RESTORATION |
| 85. | Prior to the expiry date of this Permit, the Permittee shall prepare the site in such a manner as to facilitate natural revegetation. | NATURAL
VEGETATION |
| 86. | The Permittee shall carry out progressive reclamation of disturbed areas as soon as it is practical to do so. | PROGRESSIVE
RECLAMATION |
| 87. | The Permittee shall complete reclamation of each individual project site within 12 months of completion. | SEASONAL
RECLAMATION |

88.	The Permittee shall restore any trails impacted by the land-use operation by removing fallen trees and any other obstructions from the trails.	TRAILS RESTORATION
89.	The Permittee shall, while preparing the access roads, make every effort to avoid covering or destroying traps or snares that may be found along these routes.	TRAPS PROTECTION
26(1)(p) Display of Permits and Permit Numbers		
90.	The Permittee shall display a copy of this Permit in each campsite established to carry out this land-use operation.	DISPLAY PERMIT
91.	The Permittee shall keep a copy of this Permit on hand at all times during this land-use operation.	COPY OF PERMIT
26(1)(q) Biological and Physical Protection of the Land		
92.	If any plan is not approved by the Board, the Permittee shall revise the plan according to the Board's direction and re-submit it to the Board for approval.	RESUBMIT PLAN
93.	The Permittee shall adhere to the Engagement Plan , once approved, and shall annually review the plan and make any necessary revisions to reflect changes in operations or as directed by the Board. Revisions to the plan shall be submitted to the Board for approval.	ENGAGEMENT PLAN
94.	All revised plans submitted to the Board shall include a brief summary of the changes made to the plan.	SUMMARY OF CHANGES

Mackenzie Valley Land and Water Board

Reasons for Decision

Issued pursuant to paragraph 40(2)(c) of the Mackenzie Valley Land Use Regulations (MVLUR) and section 121 of the *Mackenzie Valley Resource Management Act* (MVRMA)

Land Use Permit Amendment Application	
Preliminary Screener	MVLWB
Reference/File Number	MV2017X0019
Company	Government of the Northwest Territories – Department of Infrastructure (GNWT-INF)
Project	Miscellaneous – Mackenzie Highway, NWT #1 – Km 0-Km 278, NT
Date of Decision	September 20, 2018

These Reasons for Decision set out the Mackenzie Valley Land and Water Board’s (the Board or MVLWB) decision on an Amendment Application made by GNWT – Department of Infrastructure (GNWT - INF) to the Board on August 2, 2018 for Land Use Permit (Permit) MV2017X0019.

1.0 Background

On May 15, 2017, the Board issued Permit MV2017X0019 to GNWT-INF for the ongoing operation and maintenance of the existing NWT public highway system, specifically Highway #1, km 0-278. This Permit replaced Permit MV2010X013, which expired June 9, 2017.

In accordance with Permit condition 1 (Private Property) GNWT-INF: “shall not conduct any part of the land-use operation within 300 metres of any privately owned or leased land or structure, unless otherwise authorized in writing by the Board”.

On August 2, 2018, the GNWT – INF submitted an amendment application to access land within 300m of the Digaa Enterprises Ltd.’s property leased from the GNWT, located near Fort Providence, NT. GNWT-INF has engaged Digaa Enterprises Ltd. regarding the request (included in the application).

Board staff notes that the Waste Management Plan, Spill Contingency Plan, and Engagement Plan were all approved at issuance (attached). GNWT-INF is of the opinion that no changes were required to be made to the various management plans as a result of the Amendment Application. GNWT-INF included notification of amendment to the affected parties, in accordance with the approved Engagement Plan.

2.0 Public Review

On August 10, 2018, the Amendment Application was distributed for review, and by August 29, 2018, comments and recommendations were received from five reviewers:

- Environment and Climate Change Canada;
- Fort Simpson Metis Local 52;
- GNWT – Environment and Natural Resources (Central Email);
- GNWT – Lands (Inspector); and
- GNWT – Lands.

All of the reviewers indicated that they have no comments or concerns with the amendment application. GNWT-INF did not respond.

3.0 Adequacy of Management Plans

No changes were required to be made to the various management plans as a result of the amendment.

4.0 Security

In accordance with section 94 of the *Mackenzie Valley Resource Management Act (MVRMA)*, the territorial government is not required to post security pursuant to section 71 of the MVRMA.

5.0 Decision

In rendering its decision, the Board is satisfied that:

- notice of the Application was given in accordance with sections 63 and 64 of the MVRMA. The Board is satisfied that a reasonable period of notice was given to communities and First Nations so comments could be provided to the Board;
- the development has been screened pursuant to the MVRMA; any potential adverse environmental effects are insignificant or mitigable with known technology; and,
- there is no likelihood that the proposed development might be a cause of public concern.

After reviewing the evidence and submissions of the GNWT-Department of Infrastructure the written comments and submissions received by the Board and the Staff Report prepared for the Board, the Board, having due regard to the facts, circumstances, the merits of the submissions made to it, and to the purpose, scope, and intent of the MVRMA and Regulations made thereunder, has determined that Land Use Permit MV2017X0019 be amended subject to the term, scope, definitions, and conditions contained therein. The Board's determinations and reasons for this decision are set out below.

- The Board is satisfied that appropriate consultation has been conducted and that advice has been sought and considered, in accordance with sections 63 and 64 of the MVRMA.
- The use of land proposed by GNWT-INF is of a nature contemplated by the MVRMA.
- The operation will likely contribute to the socio-economic well-being and economic development of the region.
- The Board has reviewed the information contained in the September 10, 2018 Staff Report regarding environmental impacts and/or public concerns.
- The scope of the Permit ensures GNWT-INF is entitled to conduct activities which have been applied for and screened by the Board. In setting the scope, the Board endeavored to provide enough detail

to identify and describe the authorized activities without being unduly restrictive or prescriptive, and to allow for project flexibility throughout the life of the Permit.

- The conditions set forth in the Permit have been imposed to address the Board's statutory responsibilities and ensure the land-use operation is conducted in a manner which ensures impacts to surrounding lands and waters are minimized.

6.0 Conclusion

Land Use Permit MV2017X0019 contains provisions that the Board deems necessary to ensure and monitor compliance with the MVRMA and the Regulations made thereunder, and to provide appropriate safeguards in respect of GNWT – Department of Infrastructures use of the land affected by the Permit.
