Subject: MV2018L3-0001 - Licence terminology
Importance: High

Good morning Jessica and Sonja,

I'm in the process of pulling together the last pieces of the Board package for issuance of Sambaa K'e's Water Licence MV2018L3-0001.

It wasn't caught during the review of the draft Licence conditions, but there are a couple of spots where we inadvertently used problematic wording, in referring to 'local government boundaries'. As you probably know, Sambaa K'e does not in fact have local government boundaries (as defined by the *Mackenzie Valley Resource Management Act*), so this term can't be used in the Licence. However, we understand that the intent of this condition should remain in the Licence, so are proposing the following change:

Part D, condition 2:

The Licensee shall not accept Sewage, solid Waste, or contaminated soil from industrial, commercial and institutional operators working outside of the **community of** Sambaa K'e First Nation, unless otherwise authorized in writing by an Inspector.

This change would also be reflected in Schedule 1, where SKFN is required to report on any of these wastes that were authorized for deposit by the Inspector, in annual reporting.

In changing the term from 'local government boundaries' to 'community', the intent is to retain the concept of preventing outside waste from being deposited without authorization, and allow the Inspector and community the discretion to determine whether waste is externally or internally generated.

I am seeking confirmation that the Inspector and SKFN are comfortable with this change; if you could please respond in writing as soon as possible, that would be much appreciated. Please feel free to call me if you'd like to discuss.

Thanks,
Erica
