Subject: Porritt Landing WL Application MV2018L7-0002
Date: November 16, 2018 11:23:52 AM

Good morning Earle,

I'm hoping today to follow up with you on Water Licence Application MV2018L7-0002. The Board has not heard from the Town since September regarding its intentions to proceed with proposed activities at Porritt Landing. Information Request responses regarding land ownership and eligibility for the Town of Hay River to deposit dredged sediment from Porritt Landing on Commissioners lands were provided to the Board on [August 17, 2018](#). At that time, the GNWT confirmed that they had no issue with the activity so long as testing of the material showed no contamination and was provided for its examination. The Town proceeded with sediment sampling and results were provided to the Board and the GNWT Inspector on September 11, 2018. On September 21, 2018 Board staff asked that the Town to follow-up on the analytical results of the sediment samples with GNWT-Lands to obtain authorization for depositing the dredged material. At that time, there was some suggestion that the Town may not proceed with the application and Board staff requested that if that were the case, that the Town withdraw its application through a formal notification. Since that time, the Town of Hay River has not provided the Board with any additional information on the status of the application.

Please follow up with Board staff regarding the Town of Hay River's intentions to proceed with this application. If the Town would like to proceed, authorization from the GNWT-Lands for the deposit of dredged material onsite is required (or a commitment to dispose of the material at an authorized facility). Alternatively, if the Town would like to withdraw the application, please provide a formal notification to the Board.

Thank you,

Shannon Allerston, MA, MSc
