Hi Erica/Jacqueline/Jen, this is a follow up e mail in regards to our phone conversations in regards to the following extension request items:

#1 Porritt Landing Comments due July 25/18- The Town of Hay River would like a extension to respond to Aug 16th 2018 as I am sourcing out different types of sediment controls as outlined in a couple of the comments. We are currently also awaiting quotes on sampling of the river bed materials before any type of work is completed.

#2 Landfill ICRP- The Town has acquired the services of a Environmental Consultant(Stantec) to complete this plan for us however have been awaiting confirmation of the Drainage Study which seems to be part of this plan. We would like to request a extension to Nov 30th 2018.

#3 Landfill Drainage Study-Initially the Town of Hay River had not budgeted for this study for the 2018 year as mentioned in previous reports however The Town has been able to adjust our O/M Budget for the facility to include this for this year. We have also acquired Stantec's services for this project and request a extension to Dec 15th 2018.

Moving forward I would also like to add that in the last couple years the Town of Hay River has completed many items that have been overlooked by previous parties related to the Water Licence Criteria and have also had a good working relationship with E&R Inspectors as well as the MVLWB. I would like to thank all the staff for all the help in regards to required information as well as the updated template materials for easier use for the Municipalities. If you have any questions or concerns please feel free to contact me. Thanks
