Hi Florian, I will get you a letter out this weekend if that works, I'm a little tied up with the arena project today.

Subject: Waste Management Suggestions from ENR for Land Use Permit

Hi Earle,

We are applying for a Land Use Permit at Km 100 Hwy 1 and one recommendation for our Waste Management Plan is to get something in writing from the Hay River landfill to accept municipal waste from these activities. We have stated the municipal waste for these operations is negligible, so we are talking about wrapping material or packaging. If I had to estimate an amount I would say we may generate one garbage bag full of municipal waste in 1 year of operations. No hazardous material or material from potential spill clean ups will consist of that waste as that will be disposed of in either Yellowknife or High Level.

Could you send me something in writing if that negligible waste would be acceptable at the Hay River landfill or refer me to someone who could provide that?

Thank you.

Kind regards.

Florian Mandsfeld
