## RE: Hydrocarbon Contaminated Soil

Please accept this letter as confirmation that in the event of an equipment spill while working on a quarry site South of Hay River, the Mackenzie Regional Landfill in High Level, will accept hydrocarbon contaminated soil. We require the necessary documentation such as a Certified Laboratory Analysis, Manifest, Waste Acceptance Forms, etc. If the analysis is within our Approval limits for Alternative Daily Cover, we can use it as landfill cover material. If the material exceeds these limits we also have a Class II lined cell for disposal provided it meets those limits which include unlimited Total Petroleum Hydrocarbons.

We look forward to doing business with you in the future.

Respectfully,

A handwritten signature in black ink that reads "Bruce Underhay".

Bruce Underhay
