Explanatory Remarks -
A new access road has been built for Hay River Disposals by Carter Industries. The old access road was removed when Carter Industries completed contouring work in their land use area. The new access road is built similar to the old road, across the top of the embankment allowing Hay River Disposals continued access to their quarry area. Overburden has been windrowed to the north side of the road.

No environmental concerns were noted with the construction of the new road.
