Subject: Comments on SNP changes to exploration licence MV2019L2-0006

Kim, it was brought to my attention that some of the requested changes to the SNP aren't clear. The items and clarifications are provided below.

"Decline operations" means when we are doing exploration underground.

"Site operations" means anytime we are on site to treat water (i.e., during the summer).

"After operations" means when we are not present on site. Note, this status is from the original 2001 WL

"Bi-monthly" means every two months.

Perhaps you can post this.

Thanks.
