Dear Mr. Harpley,

Re: Containment Authorization – Land Use Permit MV2020C0008

Inspectors have reviewed the letter submitted for notification for surface drilling on September 23, 2020 and have decided not to grant authorization to have fuel containments located 5-10m from a watercourse. Inspectors recommend that the containment locations be moved to no less than 30m from any watercourse or you may store two 25L Jerry Cans within a secondary containment in the original 5-10m range from the watercourse.

Should you have any questions or concerns, please contact the undersigned at (867) 695-2626 ext.205.

Thank you,

Danielle Rogers  
Manager, Resource Management  
Department of Lands – Dehcho Region
