Hamlet of Fort Providence - Geotechnical Investigation - Type A Land Use Permit Application (MV2020X0001) (MVLWB) (MVLWB)

By submitting comments and recommendations to the Online Review System, you and/or your organization become a Party to this Proceeding and, as such, are expected to follow the Boards' [Rules of Procedure](#).

Item Description

The Hamlet of Fort Providence (the Applicant) has submitted a complete application for a Type A Land Use Permit (Permit). The purpose of this Application is for geotechnical drilling investigations and soil sampling in two locations to potentially sight an upgrade to the Hamlet's water treatment and supply system. The two locations are approximately 1.5 km north of the Fort Providence Airport on the east side of the Hamlet's access road; figures displaying the two locations are provided in the application package.

Using the Online Review System (ORS), reviewers are invited to submit comments and recommendations on the documents linked below by the review comment deadline specified. Reviewers may also wish to consider providing an overarching recommendation regarding whether the Board should approve the submission, to provide context for the comments and recommendations and assist the Board with its decision. If reviewers seek clarification on the submission, they are encouraged to correspond directly with the Applicant prior to submitting comments and recommendations.

Under the Preliminary Screening Requirement Regulations, the Board must conduct a preliminary screening for a proposed development, unless it is exempt from preliminary screening in accordance with the Exemption List Regulations. Reviewers are encouraged to provide comments and recommendations (e.g., on impacts and mitigation measures) to assist with the Board's preliminary screening determination.

Please note that the draft Permit has been developed using the MVLWB's current Standard Land Use Permit Conditions Template. Non-standard conditions are shown in green. The purpose of this draft Permit is to allow reviewers to comment on possible conditions. These draft materials are not intended to limit in any way the scope of reviewers' comments. The Board is not bound by the contents of the draft Permit and will make its decision at the close of the proceeding on the basis of all the evidence and arguments filed by all parties.

Please be advised that comments made by reviewers regarding impacts of this project to wildlife and wildlife habitat in this preliminary screening will inform the GNWT Minister of Environment and Natural Resources' determination regarding whether a Wildlife Management and Monitoring Plan will be required for this project as per section 95 of the Wildlife Act.

All documents that have been uploaded to this review are also available on our public Registry. If you have any questions or comments about the ORS or this review, please contact Board staff identified below.
