**Date:** April-16-13 5:22:21 PM

---

With respect to the letter from EC.

The results of the 2013 project indicates that there are few surficial or bedrock aquifers in the are. Husky has no current plans to conduct additional groundwater investigations in 2013-2014. However, further drilling may take place in the future if access is created into areas that have not been assessed.

An initial groundwater drilling and investigation report is in preparation that will include the results from this winter and will include borehole logs and survey data.

Hi Bob,

I thought I would forward this to you even though it was already sent to Ken.  
Please see the attached review comments from EC regarding the Surface and Groundwater Monitoring Plan.

Regards,  
Angela

Good afternoon Angela,

Please find attached Environment Canada's comments on Husky's revised Groundwater and Surface Water Monitoring Program.

Kind regards,

Loretta
