RE: Husky Licence/Permit Amendment S11A-003/S11L1-003 and Applications S12X-006 and S12F-007/S12L8-007

Dear Mr. Wallace:

The Deline Renewable Resources Council has reviewed Husky's water licence and land use applications. We have also reviewed comments submitted by the Tulit'a Renewable Resources Council related to the application, and are in full support of the recommendations.

The Deline Renewable Resources Council is primarily concerned with the cumulative impacts exploration and future development will have on our traditional land. As expressed in the letter of comment pertaining to the MGM application earlier this year we feel that the development will contribute to significant negative impacts on hunters and trappers in the region. We urge Husky, ConocoPhillips and MGM to work together to minimize impacts to wildlife.

Sincerely,

Raymond Taniton
President
