Dear Mr. Newton,

Re: Request for Waste Facility Modification – New Soil Washing Facility

The SLWB received your request on July 23, 2015, to construct a soil washing facility east of the biocells on the Mainland portion of Imperial's lease beginning around August 5, 2015. According to Part G; Conditions applying to Modifications, Item 1 a), details of the proposed Modification were not provided to the Board at least 60 days prior to the commencement of the Modification. Therefore, Item 2 of Part G applies in this case, the proposed Modification can only be carried out with written approval from the Board.

The proposed modification to the Waste disposal facility is consistent with the terms of the Licence and the Board finds no reason not to approve the proposal as described under Project Description of the July 23, 2015 submission.

As per Part G, Item 3, the Licensee shall provide as-built plans and drawing of the Modification referred to in this Licence within 90 days of completion of the Modification.

The SLWB approves construction of the new soil-washing facility as a modification to the current Water Licence.

Sincerely,

Larry Wallace
Chair
Sahtu Land and Water Board
