**Attention: Sabrina Sturman, Regulatory Specialist**

Dear Sabrina:

**Re: Request for Extension of Land Use Permit S13X-003 (Slater River Site Wide Services)**

Husky Oil Operations Limited (Husky) acknowledges that Land Use Permit (LUP) S13X-003 will be expiring on October 23, 2018. At this time we are requesting a two-year extension on the LUP with a revised expiry date of October 23, 2020.

The WL is applicable to Husky's oil and gas exploration activities associated with the Slater River project. Husky's Site Wide Services operations licenced under this WL including the following:

- Security station
- Winter access
- Construction camp
- All-weather staging site
- All-weather access
- Bridges & culverts
- All-weather base camp
- Fuel storage
- Airstrip
- Heli-pads

Winter access, security station and construction camp were originally licenced under LUP S11T-002 and the all-weather road, bridges, culverts, all-weather base camp, all-weather staging site and quarry operations were licenced under WL S12F-007. In order to allow for improved efficiency and overall reporting to the Sahtu Land and Water Board (SLWB), Husky consolidated these two Water Licences into the new WL S13X-003 in 2013.

Site Wide Services operations are in place to support activity on the Little Bear N-09 and Little Bear H-64 well locations which are currently both suspended and set for downhole abandonment in the winter 2018/19 (LUP S13A-002 and WL S13L1-005). Husky has prepared supporting documentation to outline the activity involved in well abandonment and will submit the updated documents including: Project Description, Equipment Lists, Emergency Response Plan & Spill Contingency Plan, and Waste Management Plan under separate cover.

No new footprint is required during the extension period; activities will be conducted on existing and approved clearings. No changes to the existing terms and conditions of the LUP are being requested.

## Husky Oil Operations Limited

---

As outlined in the engagement record attached as Schedule A, Husky has informed affected Indigenous communities, Land Corporations, Renewable Resource Councils and regulators in the Sahtu Region of its intention to request a two-year extension of the LUP. No concerns have been raised to Husky regarding the request for an extension to the LUP term. Given that this extension request will not require any new land use or modifications to approved works, Husky humbly requests that this LUP extension request be exempt from Preliminary Screening.

I trust this letter is sufficient for the Land and Water Board to grant an extension of the LUP. If you require additional information or, if you have any questions, please contact the undersigned at 403-523-2313 or by email at ([jenica.vonkuster@huskyenergy.com](mailto:jenica.vonkuster@huskyenergy.com)).

Sincerely,

**Husky Oil Operations Limited**
