RE: Quarry Realignment

The Department of Lands in the Sahtu Region has reviewed your request for realignment to the quarry haul road used on the Canyon Creek All Season Access Road project **S15E-004**.

We understand there is concern with lower elevation on the original plans alignment and more vegetative disturbance required to build the road as originally planned. To eliminate the concern and to lessen the need for anymore disturbance, please consider this approval to use the pre-disturbed area and haul route that you have proposed.

Also, in the future these requests must be sent by the Proponent (Department of Infrastructure GNWT) rather than the Contractor (HRN).

If you have any questions or require clarification please contact this office at 867-587-7206.

Regards,

Trevor Bremner
Manager, Resource Management
Sahtu Region
