3. Discussion

The Board received notification of Project Lead change for the Great Bear Remediation Project on February 15, 2016 which requested that the associated authorizations (S15L8-001 and S09D-001) be updated to designate the Authorization Signature as the Senior Manager, Carey Ogilvie (See Attachment 1). During Board staff conformity review of the 2015 Water Licence Annual Report for S15L8-001, which was received March 31, 2016 and deemed incomplete, Board Staff noted a minor clerical error in S15L8-001 regarding reference of the required Annual Summer Site Inspection Report. This error was noted in the Annual Report Conformity Check sent to the Licensee on May 12, 2016 as an item that would be corrected when the requested name change was processed.¹

The 2015 Progress Report for the Canol Trail Wire Clean-up Program received March 31, 2016 included a request in the accompanying cover letter that the Board recognize the Permittee using DIAND, which is the legal name of the Department (See Attachment 2)². Further correspondence noted that the Project contact would be changing and should be updated to the Senior Manager as requested for the authorizations granted for the Great Bear Lake Remediation Project (See Attachment 3).

Documents have been updated to reflect this name change and any noted clerical errors. The commencement and expiry date will not change. Draft copy of the authorizations and a Draft Issuance Letter is attached.
