Dear Ms. McKenzie,

**Re: Spill Contingency Plan Version 1.1
Board staff Confirmation of Conformity with Board direction – Plan Approved as submitted**

The Sahtu Land and Water Board (SLWB or the Board) met on February 7, 2018 to consider the land use permit and water licence applications submitted by Enbridge Pipeline (NW) Inc. (Enbridge) to support off right-of-way activities for the Saline River Line 21 Pipeline Integrity Dig Project. At that time, the Board granted issuance of both authorizations and required Enbridge submit revisions to the Spill Contingency Plan, Waste Management Plan, and Sediment and Erosion Control Plan, with the deadline date of February 16, 2018, to be in accordance with comments made during the regulatory review period and conditions included in the Water Licence (Part E, Condition 4 – Sediment and Erosion Control Plan scope). Board direction in the issuance letter states that the Plans would be considered approved upon written confirmation of conformity from Board staff.

The revised [Waste Management Plan](#) and [Sediment and Erosion Control Plan](#) (both Version 1.1) were received by the Board on February 15, 2018 and Board staff confirmed concordance with Board direction, considering both approved as submitted on February 16, 2018. The revised [Spill Contingency Plan](#) (Version 1.1) was received by the Board on February 16, 2018. It is understood that the required Project Site Map (Appendix E) will be submitted in accordance with Licence S17L1-004, Part F (Construction) condition 3 when complete. This letter hereby confirms that Version 1.1 of the Spill Contingency Plan satisfies the Board's direction in the [February 7, 2018 issuance letter](#), and the revised Plan is considered approved and has been filed on the Public Registry.

The ongoing full cooperation of Enbridge is anticipated and appreciated. If you have any questions or concerns, please contact me at (867) 598-2413 ext 224 or email sabrina.sturman@slwb.com.

Respectfully,

Sabrina Sturman
Regulatory Specialist
