- Grid Composites 7-8

Andrea,

The SLWB approves the request to re-use the soil from grid composites 7 and 8 as the soils samples

meet Licence criteria.

Sincerely,
Bonnie

Hi Bonnie, Trevor and Erin,

Please find attached a memo presenting the chemistry results for two grid areas that are currently located within the bermed area of the Norman Wells Airside LTU. We are requesting approval to consider this soil as treated for future use in re-grading the site. The soil chemistry for these grid areas meets the requirements in the Water Licence and the attached memo details these results.

We will have one more memo regarding treated soil that will be for some soil that was bagged and then underwent characterization sampling. I anticipate that this memo will go out early next week once the results are compiled.

Please review the attached and contact me with any questions or concerns.

Regards,
Andrea
