Subject: RE: S17L8-003 - Norman Wells Airside LTU - Stockpile Removal - Approval Required - SP2 and SP6

Good afternoon,

As long as the soil chemistry meets the requirements in the water license then I do approve.

Erin

Subject: S17L8-003 - Norman Wells Airside LTU - Stockpile Removal - Approval Required - SP2 and SP6

Hi Bonnie, Trevor and Erin,

Please find attached a memo presenting the chemistry results for two stockpiles that are currently located within the bermed area of the Norman Wells Airside LTU.

We are requesting approval to move these stockpiles out of the bermed area to add to the other treated soils in the previously approved laydown area. The soil chemistry for these stockpiles meets the requirements in the Water Licence and the attached memo details these results.

We are requesting a timely response as we need to continue moving soils out of the LTU so we can access the sub-liner soil and complete the sampling this season.

Trevor and Erin – I have CC'd David Peck and Alexandra Duchesne who are currently on site for BluMetric so please feel free to contact him if you want to arrange a site visit.

Please review the attached and contact me with any questions or concerns.

Regards,
Andrea

Subject: RE: S17L8-003 - Norman Wells Airside LTU - Stockpile Removal - Approval Required

Good Afternoon Andrea,

I have reviewed the soil chemistry results from the three stockpiles and agree that the data presented meets the soil criteria requirements in the Water Licence S17L8-003. The SLWB has no concerns with moving the stockpiles as indicated, provided that this request also meets with the approval of the Inspectors.

Regards,
Bonnie
