Ash:

FYI and for the public registry, copy of email received from Larry Baran (Interim Senior Administrative Officer Hamlet of Tulita) regarding the disposal of the sand and drill cuttings at the Tulita Landfill.

Regards,

Rick

Sorry for the delay, Rob.

I checked with Clayton MacCauley, our Public Works Foreman, and he sees no issue with collecting the sand and drilling cuttings at the Land Fill. It will most probably be useful as cover material.

Kindest regards,

Larry Baran

Rob:

I will confirm with our PW Foreman on Monday.

Kindest regards,

Larry Baran

Subject: Tulita landfill

Hi Larry:

As part of our work for the geotechnical investigation for the Great Bear River bridge we plan on drilling from a barge this summer. We had planned on taking the drill cuttings to the local landfill once the drilling on the river bed is complete. The cuttings are expected to be sand and gravel, do you know if there will be any objection to us disposing of the cuttings this way?

Thanks, Rob
