Attached is Type A Land Use Permit S19S-002 granted by the Sahtu Land and Water Board (SLWB or Board) in accordance with the *Mackenzie Valley Resource Management Act* and the *Mackenzie Valley Land Use Regulations*. Land Use Permit S19S-002 has been approved for a period of five years commencing March 8, 2019 and expiring on March 7, 2024. Please read all conditions carefully.

Management Plans

The Board hereby approves the Engagement Plan as submitted with the Application on January 22, 2019 and required by condition 29 of the Permit.

The Board hereby approves the Spill Contingency Plan (Version 2) submitted during the review period for this application and required by condition 22 of the Permit. The Board hereby approves the Waste Management Plan submitted with the application and required by condition 14 of the Permit.

The Board has included a non-standard condition 12 in the Permit, in the event of any release of hazardous waste due to the potential disruption of the buried historic pipeline at Plane Lake Drive (GNWT site) from drilling activity. All arrangements made by Wood E&IS to manage the hazardous waste must be reflected in a revised Waste Management Plan, which must be submitted to SLWB for approval.

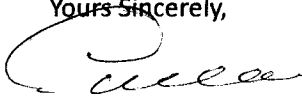

S19S-002

Should you wish to discontinue your land use operation at any time prior to the date of completion set out in this Permit, a written notice of discontinuance is required as per section 37 of the *Mackenzie Valley Land Use Regulations*, in addition to the submission of a final plan.

A copy of this Permit has been filed on the Public Registry at the SLWB office. Please be advised that this letter, with its attached procedures, inspection reports, and related correspondence is part of the Public Registry and is intended to keep all interested parties informed of the manner in which the Permit requirements are being met.
