RE: Land Use Permit Extension for Hepburn Lake Project

Dear Roberta;

Please accept this letter as Adamera Minerals Corp.'s (Adamera) request for a two (2) year extension to Land Use permit W2015C0002 as per section 4.4.2 of the MVLWB Guide to the Land Use Permitting Process.

This request is based on the fact that our current land use permit expires on March 25, 2020 and planned exploration work as well as Final Cleanup and Restoration (as per subsection 26(1) of the Mackenzie Valley Land Use Regulations) remains to be conducted. This is due to recent past market conditions such that Adamera has not been able to conduct planned exploration or reclamation work as outlined in our 2005 land use permit application. However, indications of a stronger resource market are beginning to emerge bringing the opportunity for additional exploration funding, including restoration, to the Northwest Territories.

It is Adamera's intention to complete its obligation of restoration to the current campsite and fuel cache in the near future as well as concurrently conducting preliminary

grassroots exploration involving prospecting/sampling and minor ground geophysics from the same camp over the next 2 field seasons.

Please note that all terms and conditions of the current land use permit will be adhered to if this extension is granted.

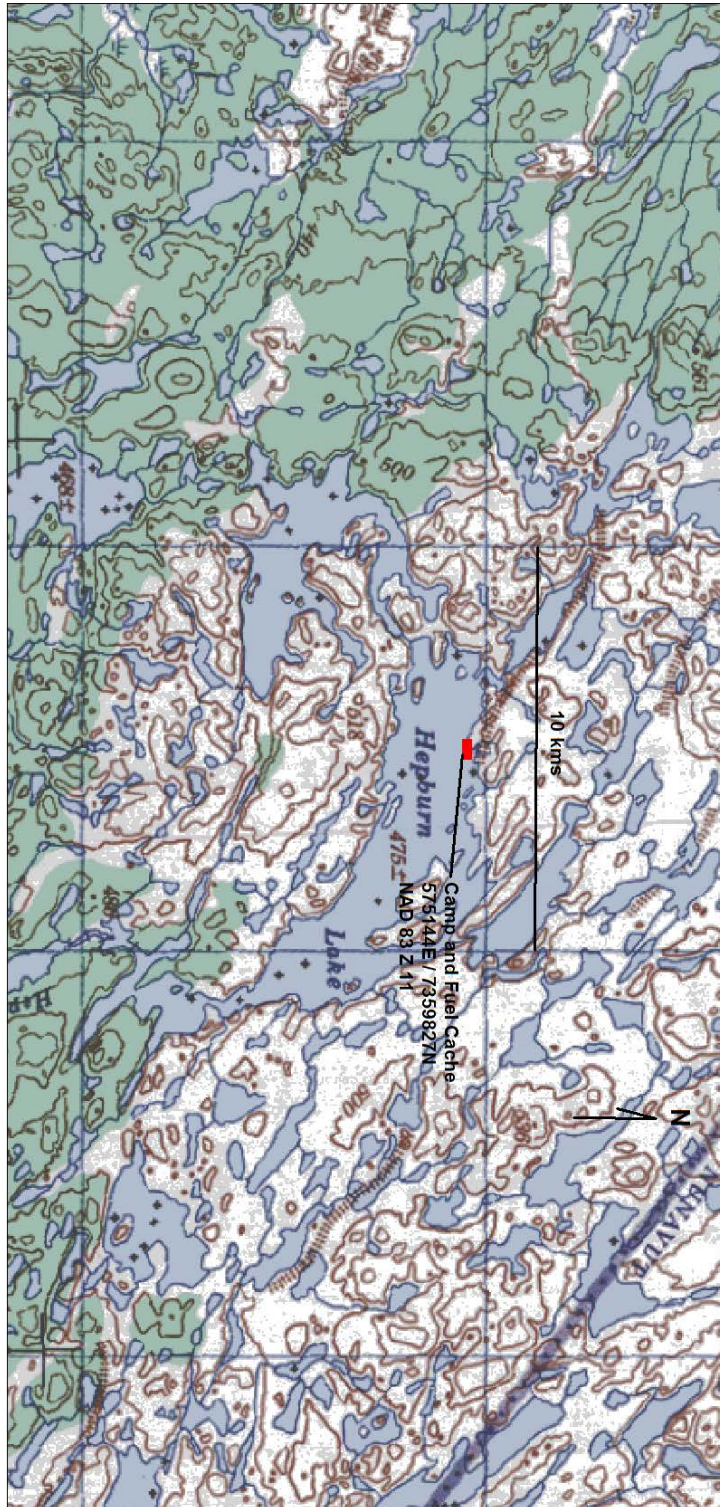

Attached to this request letter is our Engagement Plan, Record of Engagement, an example of our Pre Submission Engagement letter and a copy of the current Land Use Permit for reference. As well, a location map, picture of camp, camp inventory, method of storage is included within this request letter.

If you have any questions or concerns please contact me by phone at 604 992-9674 or by e-mail at [gillgeo1@hotmail.com](mailto:gillgeo1@hotmail.com).

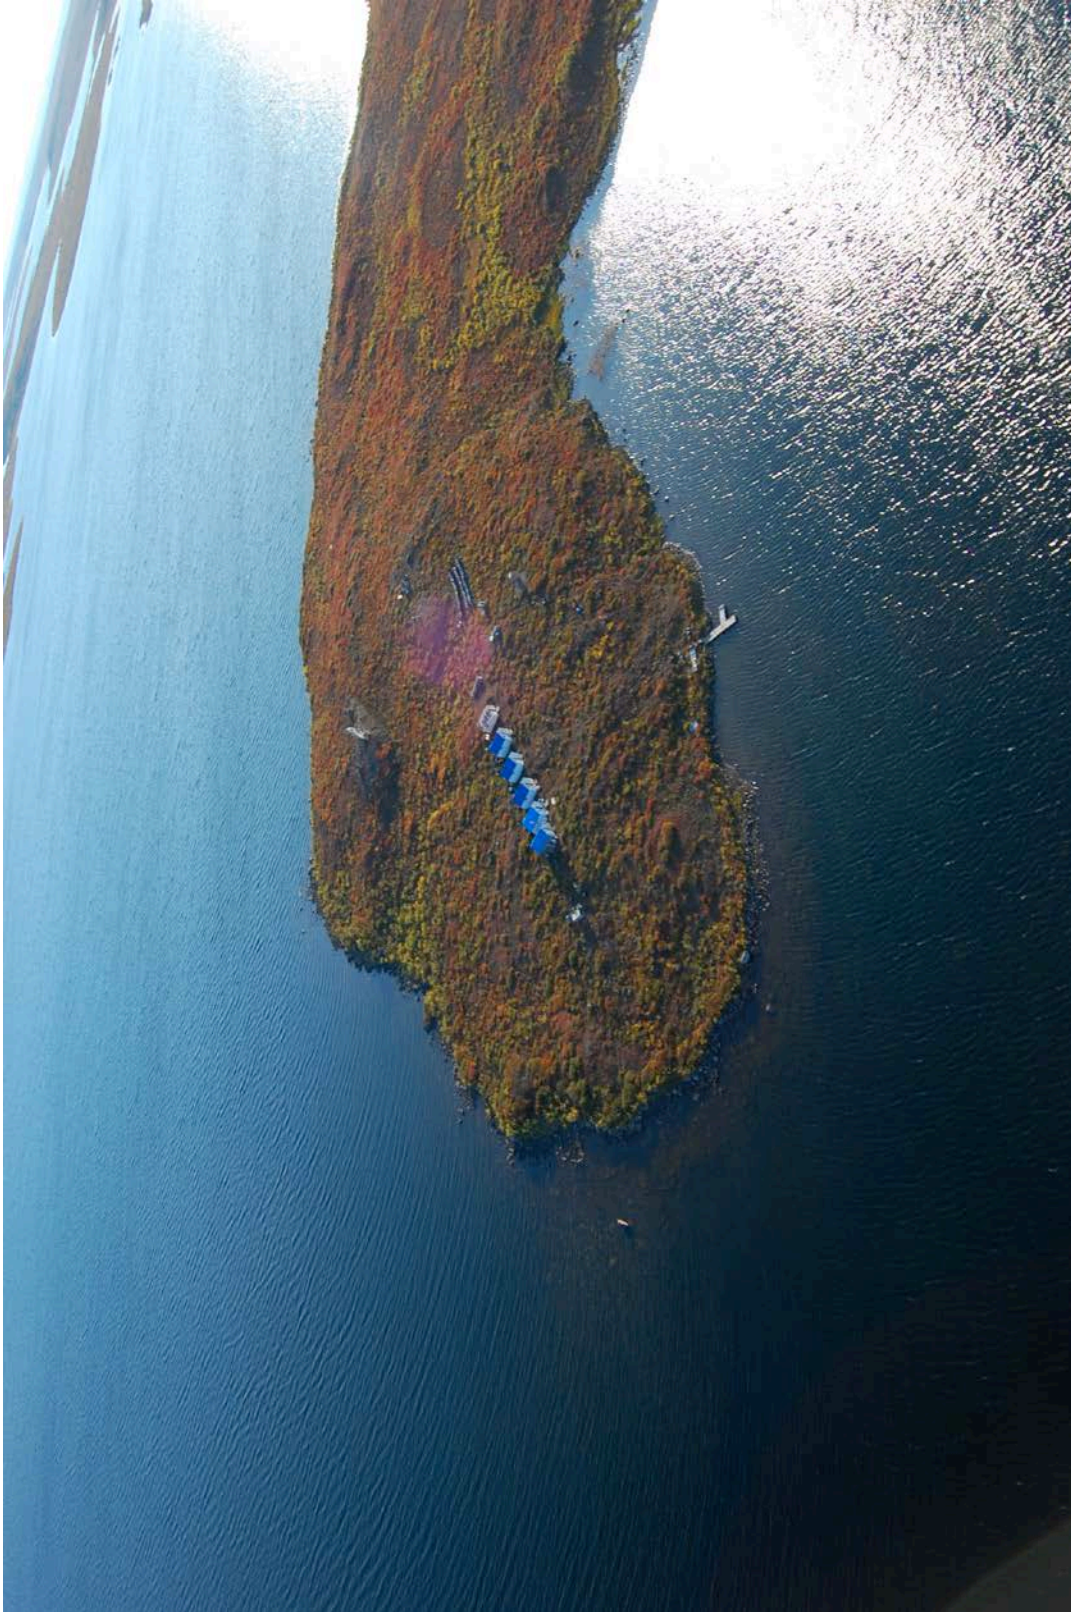

Yours truly,

*“Graham Gill”*

All camp equipment including generator supplies, furnishings, appliances, office equipment, kitchen supplies, safety equipment, tools and other miscellaneous supplies stored in hard-sided shack (the “dry”) shown as the tent frame on the left side of the picture attached.

Note that no canvas tents remain, only the wooden structures.

Fuel has been stored at this site since the current land use permit was issued and Fuel Spill Contingency Plan approved.

All drums are on their side well away from any water body and bungs at 3 and 9 o'clock. 40 empty drums provided secondary containment. A fuel spill kit is onsite.
