Subject: RE: Benton Resources Inc - W2015C0008 - LUP Extension - Confirmation of Eligibility
Date: September 17, 2020 10:24:31 AM

Meaghan,

Thanks for the opportunity to comment and to complete this land use operation, an extension to the above noted land use permit is required, otherwise the Permittee may be non-compliant with provisions of the *Mackenzie Valley Land Use Regulations* (Sections 15 & 16).

Therefore, GNWT-Department of Lands supports an extension being granted since Section 18 eligibility requirements are present to complete this land use operation.

For your information, the same scenario occurred for Adamera (W2015C0002) and an extension was granted to allow for further time to complete the permitted land use operation.

Please give me a call if you have any further questions or concerns.

Regards,

Clint

Hello Clint,

The Wek'èezhii Land and Water Board has received an extension [request](#) from Benton Resources Inc. The current permit, [W2015C0008](#), expires September 23, 2020.

Board staff have identified that the mineral claims for this project are no longer active; however,

understand that an extension to this Permit is required to continue with final clean-up and restoration.

As the landowner for the permitted area, can the GNWT Department of Lands indicate in writing whether they believe the eligibility requirements set out in Section 18 of the Land Use Regulations have been satisfied? It would be greatly appreciated if a response could be provided as soon as possible.

Please feel free to contact us should you have any questions.

Masi!

Meaghan MacIntyre-Newell, M.Sc. (she/her)
