Dear Mr. Mackenzie,

Subject Request for extension to Fortune Minerals Limited Land Use Permit W20160002

Land Use Permit W20160002 currently held by Fortune Minerals Limited (Fortune Minerals) is scheduled to expire on March 23, 2021. This permit covers the care and maintenance and exploration activities at the NICO Project site. Fortune is still in the process of financing the project so the site will remain in care and maintenance until the company is in a position to move forward with construction. Fortune is requesting a two (2) year extension to land use permit W20160002.

Fortune has provided written notice of the extension request to the Tlicho Government and North Slave Metis Alliance (NSMA) on December 03, 2020. Neither group had any concerns or comments with the two-year extension request: The engagement records are provided in Appendix I (Tlicho Government) and Appendix II (NSMA) attached to this letter.

Fortune then sent written notice to Government Agencies on January 27th on its intention to submit the LUP extension request. Replies were received from all the agencies contacted and no concerns or comments were given. The record of these communications is provided in Appendix III. Finally, written notice was sent to all of the Aboriginal Organizations listed on the most recent version of the Wek'èezhii Land and Water Board (WLWB) Pre-Submission Engagement Contact List. No comments or concerns were received although not all organizations chose to respond despite repeated attempts. The record of these communications efforts and responses are provided in Appendix IV.

Should you have any questions concerning this LUP extension request please do not hesitate to contact the undersigned.

Yours truly,

FORTUNE MINERALS LIMITED

Rick Schryer, Ph.D.
VP Environmental and Regulatory Affairs
