Mr. Vasishta,

Re: Final Clearance and Closure of Land Use Permit G05X008 – km 24

Please be advised the final plan submitted by GNWT INF on November, 14 2008 has been accepted.

As you are aware, there were concerns regarding a potentially undetonated explosive at the km 24 quarry site (circa 1996), and that GNWT Lands inspectors were seeking advice from WSCC/ NWT mining inspector for additional direction prior to recommending file closure. The Gwich'in Land and Water Board has recently received notification from GNWT Department of Lands that WSCC has re-visited this file and determined that it has no further concerns; the Department of Lands has recommended file closure.

Final clearance of Land Use Permit **G05X008** has been granted, and our files are now closed, as per Section 33 of the Mackenzie Valley Land Use Regulations (MVLUR).

Please do not hesitate to contact me should you have any questions regarding this letter.

Sincerely,

Alec Sandra Macdonald
Regulatory Specialist

Cc: Dan Carmichael – Superintendent – GNWT Lands, Beaufort Delta Region
