Subject: RE: Amendment to LUP MV2004C0001 - Dunsmuir

Clint,

since the camp is within their claim blocks as approved in their application and the permit has existing conditions to deal with the use of camp, I feel an amendment is not required to relocate the camp to lac de gras and could be done as a field modification. Please copy us if you issue something in writing for the field mod. Letter from Peregrine on name change is attached for your files.

If you give me an e-mail stating that you don't see this as an amendment, then I will gladly do it. Sounds good to me.

Clint

Good morning Peter,

The current land use permit already allows for a camp of greater than 400 man days as it is a Type A permit. This amendment is actually for relocation of a camp. The permit says an existing camp on Afridi Lake can be utilized but the Permittee wants the camp location changed to suit the needs of an upcoming program.

Just wanted to clarify that for all. And that is correct is it not Peter Holmes?

Have a good day

Clint

Dear Peter,

Please find attached Peregrine Diamond Ltd's application for a temporary exploration camp to be built in the Lac de Gras area. The current type "A" land use permit only allows activity from the camp for 199 man-days. The planned exploration in the area will run for six to eight weeks which would significantly exceed the limit. Please let me know if the application is deficient in any aspect. The original will be sent via courier with the \$150 fee.

Please do not hesitate to contact me if you have any questions about Peregrine's planned activities in the area.

Best regards,
Peter Holmes
