Date: August-03-11 6:31:56 PM

What is the Consultation process for implementing such an order, approving the plan?

Should we expect notification from the LWB? Screening?

Greetings,

Attached for your information is the Reclamation Plan to permanently mitigate the historic tailings at Jo-Jo Lake (NT Spill 11-159).

The Reclamation Plan involves placing 0.4 to 0.5 m thick gravel / coarse rock across Jo-Jo Lake. The gravel would then be covered with a 0.3 to 0.5 m thick layer of fine sand with organics to allow the establishment of vegetation cover. Further details are included in the attached document by Golder Associates titled Preliminary Project Scope for Jo-Jo Lake - Reach 6 Baker Creek Pond Giant Mine, Yellowknife, dated August 2, 2011.

If there are any questions or comments please do not hesitate to contact the undersigned.

Yours truly,

Adrian Paradis
