Subject: RE: Request for Extension of Land Use Permit MV2013P0011

Angela,

The MV2013P0011 LUP extension request was discussed at a February 2, 2018 Environmental Management Committee meeting with representatives from SKFN, DFN, LKFN, JMRFN, and PKFN. Chief Sanguex expressed an interest in a community visit to Jean Marie River to discuss the LUP renewal. Enbridge indicated that community visits would be a component of engagement activities prior to submitting a LUP renewal application. Enbridge has also informed the Fort Simpson Metis #52 that an extension would be requested.

The LUP extension request was discussed, among other things, with the following stakeholders during in-person meetings held January 29-31, 2018, and follow-up letters and meeting minutes were provided to all parties.

- Town of Norman Wells
- Hamlet of Tulita
- Norman Wells Land Corporation
- Tulita District Land Corporation
- Tulita Land Corporation
- Fort Norman Metis Land Corporation
- Tulita Renewable Resource Council

No concerns have been raised to Enbridge regarding the request for an extension of the LUP term.

Please let me know if you have any questions regarding the above.

Sarah
