b) Waste Disposal

The monthly and annual quantities in cubic metres of each and all Waste discharged to the Waste Disposal Facilities, including sludge from the Water Treatment Plant;

² According to the Licence, this amount is not to exceed 40,000m³ annually.

Please list in the sections and tables below the amounts of solid waste (i), sewage (ii), sludge from the Water Treatment Plant (iii), and any other wastes (iv) deposited at the Waste Disposal Facilities (e.g. recyclables, tires, household hazardous waste, scrap metal, and other wastes that may be periodically shipped out.).

i) Solid Waste

The Government of the Northwest Territories – Municipal and Community Affairs (GNWT-MACA) has provided a standard formula for estimating the amount of solid waste deposited into a Solid Waste Facility in the absence of a metered garbage truck. The following can be used: **Volume per person per day X number of days X population.**

e.g. **0.015 m³ X 30 days X 860 people = 387 m³ of domestic trash deposited into Solid Waste Facility in a 30 day month**
