Hi Jas,

No problem. I'm here to help with any questions/concerns that come up.

Good luck with sampling tomorrow!

Wendy

Hi Wendy,

Thank you for your email. I will follow up with Lloyd today. We are doing the testing tomorrow and will be bringing it to Hay River tomorrow afternoon. I believe the lab would be able to administer the preservatives, I will call today Judy to confirm this.

I will make a note for Inventory in April. I appreciate all the help in making sure we are according to the license.

Thank you,

Jas Pannu

Hi Jas,

I received a call from Lloyd Norn at the WTP yesterday and he asked that I follow up with you. He mentioned that the Hamlet is gearing up to do fall water license sampling, but don't have any preservative for the HEM (Oil & Grease). I would recommend sampling without preservation for the HEM, if you can get the samples to the lab within the 24 hour hold time. The lab can preserve the samples upon arrival. Please note/request this on the field sheet/analysis request form.

In addition, I also recommend doing an inventory in April to determine what the Hamlet will require for bottles and supplies for the 2022 season and place an order with Judy at Taiga Labs. See the email attached regarding the Fort Resolution SNP Manual with details for bottle orders. I would also recommend printing off the pdfs in the attached email and posting copies in the WTP for SNP samplers to reference in future. If you have any questions with regard to the above, or the attached email, don't hesitate to contact me.

Judy, can you please prepare ~15 vials of the HEM sulphuric acid preservative and ~15 vials of the nitric acid preservatives in a package and ship it to Hay River for pick up by Hamlet staff? Please let me know if this is feasible. Thanks in advance!

Regards,

Wendy
